

图书基本信息

书名：《2010年CNPC井筒技术国际研讨会论文集》

13位ISBN编号：9787502180713

10位ISBN编号：7502180710

出版时间：2010-10

出版社：2010年CNPC井筒技术国际研讨会论文集编委会 石油工业出版社 (2010-10出版)

作者：2010年CNPC井筒技术国际研讨会论文集编委会

页数：539

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

书籍目录

Heavy Oil Development by Steam Injection and Relevant Techniques
Practice and Research of Fracturing and Acidizing in Horizontal Wells
Integrated Solutions for Remaining Oil Saturation Evaluation by Logging Methods
Comprehensive Supporting Technologies For Exploration And Development Of Ainu - Dar'ya Complex Sub- Salt Gas Reservoir
Offshore High Temperature Carbonate Reservoir Acid Fracturing Research and Application
Performance Evaluation on CO2 Foam Fracturing Fluid
Pore Texture Evaluation of Carbonate Reservoirs in Turkmenistan' s Gas Field
A Production Well Information Management System and Its Application
Information Remote Transmission Technology & Application in Interpretation & Monitoring while Drilling & Geological Researches
Well Hole Information Services System and Application
Combination Technology of Production- Testing And Stimulation
311 Automatic Vertical Drilling System
Study and Application of Expandable Tubular Technology for Completion
Horizontal Well & Multilateral Horizontal Well Technology Application
Drilling and Completion Technology Research of Blowout and Lost Circulation Co-existence in Sour Gas Well
The Whole Process of Underbalanced Drilling/Completion
Comprehensive Technology of Drilling and Completion for Horizontal Wells in Ultra- shallow Heavy Oil Reservoirs
Horizontal Well Drilling and Completion Technology in Daqing oil field
Limestone Reservoir Slim Casing Short Radius Multilateral Well Drilling & Completion Technology
Comprehensive Technology of Drilling and Completion for Jida 4 Well in Fergana Basin, Uzbekistan
Horizontal Well Drilling Practice in Gas Reservoirs Below an Ultra- Thick Salt Layer
Application of Offshore Optimized Drilling in Bohai Bay
Optimized Cluster Drilling Technology Delivers Outstanding Results in Sulige Gas Field, Ordos Basin
Integrated Geology & Drilling Technology of Horizontal Wells
Complicated Formations Coring Technology
Application of Environmental Friendly Sinol - AMO Water - free Oil Based Drilling Fluid (OBM - Oil - Based Mud)
Study and Application of BH - WEI "Tri - high" Drilling Fluid
Research on Sulfosalt Multipolymer High Temperature Seawater Base Drilling Fluid
Research and Application of Deep Well High - temperature Resistant Drilling Fluid in Daqing Oilfield
Bio -tech Fuzzy -ball Drilling Fluids for Leakage Protection and Sealing in CBM wells
SIAT as Shale Inhibitor in Water- Based Drilling Fluids
High Temperature High Density Water- Based Systems
Matching Technology and Application of Snubbing Operation
Design and Practice of Auto - control Systems for Managed Pressure Drilling
Research of the Prevention and Remedial Measures of Sustained Casing Pressure
in Complicated Gas Wells
Study and Application of Formation Pressure MWD Technology in Daqing Oilfield
Application of Formation Pressure Detection Technique in the Prosopis Area of Chad
Cementing Technology Research and Application for Gas Wells with "High Pressure, High H2S and High Risk" in Chuanyu Area
Cementing Technologies for Infill Wells in Daqing Oilfield
Research and Application of Cementing Techniques for Deep and Super - deep Wells in The Fergana Basin of Uzbekistan
Ultra- High Density Cement Slurry Cementing Technique
Cementing Technologies for High Pressure Gas Wells in Complex Formations
Research on a New Methodology to Evaluate the Gas Migration in Cement Slurries
Screen Completion Technology for Horizontal Wells with Reservoir Protection
Underbalanced Gel Valve Completion Technology
Coiled Tubing Operation Technology
Network - Based Logging System - LEAP800
Development and Application of the Triple Combo Formation Evaluation Logging While Drilling System
The Technology of Remote Exploration Acoustic Reflection Imaging Logging
Digital Core Technology Research and Application
The Evaluation Technique of Complex Lithology Reservoirs
HPHT Well Testing Technology
Technology Development of EI Log Full - Suit Logging System
High- resolution Logging Technologies of Daqing Oil Field
The Technical Situation and Development Thought of Domestic Imaging Logging Systems
Well Logging Technology and Applications in the Cased Hole
The Deep Penetrating Perforation Technology of Multistage Pulse
The New Development of Conventional Gas Logging Data Interpretation Me(hod
The Application of Geochemical Logging in Wellbore Services
Applications of Engineering Logging Techniques in Deep Wells
New Technology of Mud Logging Data Processing and Interpretation of Oil - gas - water Formations and Its Application in Daqing Oilfield
The Application Study of Light Hydrocarbon Logging in the Assessment of Water- Oil Reservoirs
The Integrated Application of Well Testing and Logging Data in the Early Exploration Phase of G Oil Field
The Fluid Property Visual Identification Method and Quick Evaluation Technology in Igneous Reservoirs

编辑推荐

中国石油天然气集团公司(简称中国石油集团、中石油、CNPC)是一家集油气勘探开发、炼油化工、油品销售、油气储运、石油贸易、工程技术服务和石油装备制造于一体的综合性能源公司。2008年，中国石油在美国《石油情报周刊》世界50家大石油公司综合排名中，位居第5位，在美国《财富》杂志2008年世界500强公司排名中居第25位。2010年5月30日，根据英国《金融时报》研究机构的报告显示，中石油当前市值达到3293亿美元，位居全球500强企业榜首，成为全球市值最大的企业。这部《2010年CNPC井筒技术国际研讨会论文集(英文版)》(作者2010年CNPC井筒技术国际研讨会论文集编委会)是其英文版研讨会论文集。
