《方剂学图表解》

内容概要

《方剂学图表解(英文)》内容简介：The Formulae Study Guide from the PMPH Study Guide Series is an invaluable tool for those attending Chinese medicine schools or those merely interested in understanding formulae. Based on China's national Textbook for formulae, this book covers basic knowledge about the formulae and 225 of the most commonly used formulae. Designed as a companion to textbooks in the West, the essential and often complicated content of this book is presented in comprehensive and easy to understand figures. Tables of similar formulae are laid out in a concise and simple format, with indications and actions, facilitating ease of understanding and comprehension, and making it easy to remember.
