内容概要

The LNCS Journal on Data Semantics is devoted to the presentation of notable work that, in one way or another, addresses research and development on issues related to data semantics. Based on the highly visible publication platform Lecture Notes in Computer Science, this new journal is widely disseminated and available worldwide.

The scope of the journal ranges from theories supporting the formal definition of semantic content to innovative domain-specific applications of semantic knowledge. The journal addresses researchers and advanced practitioners working on the semantic web, interoperability, mobile information services, data warehousing, knowledge representation and reasoning, conceptual database modeling, ontologies, and artificial intelligence.

书籍目录

Emergent Semantics Viewpoints on Emergent Semantics f-SWRL: A Fuzzy Extension of SWRL Intensional Semantics for P2P Data Integration Integrating and Exchanging XML Data Using Ontologies Managing Uncertainty in Schema Matching with Top-K Schema Mappings Semantic Data Management in Peer-to-Peer E-Commerce Applications Interoperability Through Emergent Semantics A Semiotic Dynamics Approach Emergent Semantics from Folksonomies: A Quantitative Study Emergent Semantics in Knowledge Sifter: An Evolutionary Search Agent Based on Semantic Web Services Author Index
