

# 《传感器应用中的有机半导体》

## 图书基本信息

书名：《传感器应用中的有机半导体》

13位ISBN编号：9787301216613

10位ISBN编号：7301216610

出版时间：2012-12

出版社：北京大学出版社

页数：287

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

# 《传感器应用中的有机半导体》

## 内容概要

《传感器应用中的有机半导体(影印版)》通过讨论光电传感器的相关概念，涵盖了这一快速发展的领域的方方面面。《传感器应用中的有机半导体(影印版)》呈现了基于有机发光二极管、有机薄膜晶体管 and 片上系统架构的新型传感器，并指出了增强其特异性的技术，探讨了传感器的响应模型。

# 《传感器应用中的有机半导体》

## 书籍目录

1 Water Soluble Poly ( fluorene ) Homopolymers and Copolymers for Chemical and Biological Sensors 1.1 Introduction 1.2 General Structures and Properties 1.2.1 Design, Synthesis, and Structural Properties 1.2.2 Optical Properties 1.3 Signal Transduction Mechanisms in Sensors 1.4 Chemo- and Biosensor Applications 1.4.1 DNA Sensors 1.4.2 RNA Sensors 1.4.3 Protein Detection 1.4.4 Glucose Sensors 1.4.5 Detection of Other Small Molecules 1.5 Heterogeneous Platforms 1.6 Summary and Outlook References

2 Polyelectrolyte-Based Fluorescent Sensors 2.1 General Introduction 2.1.1 Amplified Fluorescence Quenching 2.1.2 General Sensor Schemes : Bioassays Based on Quench/Unquench 2.2 Enzyme Activity Assays 2.2.1 Assay Formats and Types 2.2.2 Proteolytic Enzyme Assays Using Conjugated Polyelectrolytes 2.2.3 Phospholipase Assays Using Conjugated Polyelectrolytes 2.2.4 Assays Based on "Frustrated Super-Quenching" 2.2.5 Supramolecular Self-Assembly and Scaffold Disruption/Destruction Assays 2.2.6 Cyanines and Supra-Molecular Self-Assembly 2.2.7 Cyanine Chemistry 2.2.8 Glycosidases and Scaffold Disruption/Destruction Assay 2.3 Conjugated Polyelectrolyte Surface-Grafted Colloids 2.4 Summary and Conclusions. References

3 Structurally Integrated Photoluminescent Chemical and Biological Sensors : An Organic Light-Emitting Diode-Based Platform 3.1 Introduction 3.1.1 Photoluminescence-Based Sensors 3.1.2 Structurally Integrated OLED/Sensing Component Modules 3.1.3 Structural Integration of the OLED Array/Sensing Film 3.2 Single Analyte Monitoring 3.2.1 Gas-Phase and Dissolved Oxygen 3.2.2 Enhanced Photoluminescence of Oxygen-Sensing Films Through Doping with Titania Particles [70] 3.2.3 Glucose 3.2.4 Hydrazine ( N<sub>2</sub>H<sub>4</sub> ) 3.2.5 Anthrax Lethal Factor ( LF ) 3.3 Advanced Sensor Arrays 3.3.1 OLED-Based Multiple Analyte Sensing Platform 3.3.2 Extended Structural Integration : OLED/Sensing Component/Photodetector Integration 3.4 Future Directions 3.4.1 Improved OLEDs 3.4.2 Sensor Microarrays 3.4.3 Autonomous Field-Deployable Sensors for Biological Agents 3.5 Summary and Concluding Remarks References

4 Lab-on-a-Chip Devices with Organic Semiconductor-Based Optical Detection 4.1.1 Microfluidics and Lab-on-a-Chip 4.1.2 Detection Problem at the Microscale 4.2 Fabrication 4.2.1 Microfluidic Systems..... 4.2.2 Solid-State Chemosensitive Organic Devices for Vapor-Phase Detection

5 Solid-State Chemosensitive Organic Devices for Vapor-Phase Detection

6 Detection of Chemical and Physical Parameters by Means of Organic Field-Effect Transistors

7 Performance Requirements and Mechanistic Analysis of Organic Transistor-Based Phosphonate Gas Sensors

8 Electrochemical Transistors for Applications in Chemical and Biological Sensing

9 PEDOT : PSS-Based Electrochemical Transistors for Ion-to-Electron Transduction and Sensor Signal Amplification

Index

# 《传感器应用中的有机半导体》
