

## 图书基本信息

书名：《Mathematical Foundations of Computer Science 2006计算机科学的数学基础 2006》

13位ISBN编号：9783540377917

10位ISBN编号：3540377913

出版社：湖北辞书出版社

作者：Kralovic, Rastislav; Urzyczyn, Pawel;

页数：814

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

## 内容概要

This book constitutes the refereed proceedings of the 31st International Symposium on Mathematical Foundations of Computer Science, MFCS 2006, held in Stará Lesná, Slovakia in August/September 2006. The 62 revised full papers presented together with the full papers or abstracts of 7 invited talks were carefully reviewed and selected from 174 submissions. All current aspects in theoretical computer science and its mathematical foundations are addressed, ranging from algorithms and data structures, to complexity, automata, semantics, logic, formal specifications, models of computation, concurrency theory, computational geometry, parallel and distributed computing, networks, bioinformatics, quantum computing, cryptography, knowledge-based systems, and artificial intelligence.

## 书籍目录

Invited Talks A Core Calculus for Scala Type Checking Tree Exploration with an Oracle Distributed Data Structures: A Survey on Informative Labeling Schemes From Deduction Graphs to Proof Nets: Boxes and Sharing in the Graphical Presentation of Deductions The Structure of Tractable Constraint Satisfaction Problems On the Representation of Kleene Algebras with Tests From Three Ideas in TCS to Three Applications in BioinformaticsContributed Papers Decompositions, Partitions, and Coverings with Convex Polygons and Pseudo-triangles Approximate Shortest Path Queries on Weighted Polyhedral Surfaces A Unified Construction of the Glushkov, Follow, and Antimirov Automata Algebraic Characterizations of Unitary Linear Quantum Cellular Automata A Polynomial Time Nilpotence Test for Galois Groups and Related Results The Multiparty Communication Bounds and New Problems Crochemore Factorization of Sturmian and Other Infinite Words Equations on Partial Words Concrete Multiplicative Complexity of Symmetric Functions On the Complexity of Limit Sets of Cellular Automata Associated with Probability Measures Coloring Random 3-Colorable Graphs with Non-uniform Edge Probabilities The Kleene Equality for Graphs On the Repetition Threshold for Large Alphabets Improved Parameterized Upper Bounds for Vertex Cover On Comparing Sums of Square Roots of Small Integers A Combinatorial Approach to Collapsing Words Optimal Linear Arrangement of Interval Graphs The Lempel-Ziv Complexity of Fixed Points of Morphisms Partially Commutative Inverse Monoids Learning Bayesian Networks Does Not Have to Be NP-Hard.....Author Index
