

# 《Microengineering of 》

## 图书基本信息

书名：《Microengineering of metals and ceramics金属与陶瓷的微工程，第II部分》

13位ISBN编号：9783527314935

10位ISBN编号：3527314938

出版时间：2005-11

作者：Lohe, Detlef; Haufelt, Jurgen;

页数：644

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

## 内容概要

Microstructures, electronics, nanotechnology - these vast fields of research are growing together as the size gap narrows and many different materials are combined. Current research, engineering successes and newly commercialized products hint at the immense innovative potentials and future applications that open up once mankind controls shape and function from the atomic level right up to the visible world without any gaps.

Continuing from the previous volume, authors from three major competence centres for microengineering here cover all aspects of specialized replication techniques and how to employ state-of-the-art technologies for testing and characterizing micro-scale components, and illustrate quality control aspects and strategies for automation of production procedures in view of future industrial production and commercialisation.

## 书籍目录

PrefaceForewordList of Contributors Replication Techniques - Micro Casting, Micro Electro Forming and Further Techniques13 Microcasting14 Microelectroforming of Metals15 Further Ceramic Replication Techniques Automation and Quality Assurance16 Automation of the Powder Injection Molding Process17 Microassembly - Approaches to Meet the Requirements of Accuracy18 Quality Assurance and Dimensional Measurement Technology Properties of Materials and Microcomponents19 Analysis of" Microstructure, Surface Topography and Mechanical Properties of Microcast Specimens Made of the Dental Gold Alloy Stabilor G20 Microstructure, Surface Topography and Mechanical Properties of" Molded ZrO<sub>2</sub>Microspecimens21 Tribological Characterization of Mold Inserts and Materials for Microcomponents22 Development of a Simulation Tool for Wear in Microsystems Subject Index
