《Architecture Highlig》

内容概要

This new Architecture Highlights volume is based on the 2007 edition, which sold out instantly after its publication. Since then Shanglin continue its quest to track the creation of the most important figures in contemporary architecture on the globe and adhere to its editing criterion and idea. The architects featured here are characterized in America, Asia/Pacific and Europe chapter, constituting a regional background of different culture and society. 100 wonderful design works from these unique and internationally celebrated architects reflect the dynamic trends of contemporary architecture; furthermore, this volume is an aggregation of language and technique, style and tide, concept and thought. It explores the true meaning of architecture to the human's world and proposes various possibility of architecture design in reality and future.
