## 内容概要

Relational structures abound in our daily environment: relational databases, data mining, scaling procedures, preference relations, etc. As the documentation of scientific results achieved within the European COST Action 274, TARSKI, this book advances the understanding of relational structures and the use of relational methods in various application fields. The 12 revised full papers were carefully reviewed and selected for presentations. The papers are devoted to mechanization of relational reasoning, relational scaling and preferences, and algebraic and logical foundations of real world relations.

## 书籍目录

RELVIEW and RATH - Two Systems for Dealing with Relations  
The GUHA Method and Foundations of (Relational) Data Mining  
Mechanised Reasoning and Model Generation for Extended Modal Logics  
Theory Extraction in Relational Data Analysis  
An Environment for Specifying Properties of Dyadic Relations and Reasoning about Them. I: Language Extension Mechanisms  
Consistent Representation of Rankings  
Axiomatic and Strategic Approaches to Bargaining Problems  
Categoric and Ordinal Voting: An Overview  
Relational Models of Lambek Logics  
Approximation Operators in Qualitative Data Analysis  
Lattice-Based Relation Algebras and Their Representability  
Binary Multirelations
