《ART & BUILD ARCHITEC》

内容概要

Art and Build is committed to turning thoughts into reality, leading to the built form in a time window where contextual parameters of matter, form and light crystallise. The monograph explores the work of this European architectural practice with offices in Brussels, Paris and Luxemburg. In almost twenty years of practice, its focus has been on excellence while developing its identity in every project with which it has been involved. The dialogue between art and construction is fundamental in Art and Build's philosophy, and implies a synthesis of invention and thoroughness, liberty, efficiency and of forward thinking and construction.
