《酒吧餐厅设计Within Bars &》

内容概要

Wining and dining are two of the greatest pleasures of life; they are also a quintessential part of urban living. As Asia quickens its pace of urbanisation, its bars and restaurants have also undergone a radical makeover of an international standard. Within Bars & Restaurants gathers some of the most outstanding bar and restaurant designs in the region, responding to the newly shaped realisation that a truly extraordinary wining and dining experience can only be fulfilled by a design that appeals to all of the senses. Filled with page after page of hip and stylish ideas that combine contemporary design language with new Asian aesthetics, this book introduces the hallmarks of contemporary Asian design in a refreshing manner. It is bound to delight and inspire architects, designers, bar and restaurant operators, as well as the design-savvy public. With spectacular photographs taken from attractive angles - both conventional and creative - Within Bars & Restaurants covers just about every genre of cuisine and establishment, from cafes, wine bars and eateries, to fine dining restaurants. Underlying this myriad of types is simply good, appetising design that is delectable to all of the senses.
