《对象模型化与OCL》

内容概要

As part of the UML standard OCL has been adopted by both professionals in industry and by academic researchers and is one of the most widely used languages for expressing object-oriented system properties. This book contains key contributions to the development of OCL. Most papers are developments of work reported at different conferences and workshops. This unique compilation addresses many important issues faced by advanced professionals and researchers in object modeling like e.g. real-time constraints, type checking, and constraint modeling.

《对象模型化与OCL》

书籍目录

Introduction A Meta-model Facility for a Family of UML Constraint Languages A New Type Checking Approach for OCL Version 2.0? OCL: Syntax, Semantics, and Tools On the Precise Meaning of OCL Constraints Expressing UML Class Diagrams Properties with OCL The Amsterdam Manifesto on OCL An OCL Extension for Real-Time Constraints Statistical Constraints and Verification 《Java》 OCL Based on New Presentation of the OCL-Syntax The Semantics of the OCL Action Clause Constraint Trees Using OCL and UML to Specify System Behavior Author Index
