

《概率和随机 (英文影印版)》

图书基本信息

《概率和随机 (英文影印版)》

内容概要

《概率和随机》是一部兼顾理论和应用的，讲述概率和随机研究生教材。本书的风格仍然是这个系列的延续，注重随机过程的理论，但却非一味强调理论和抽象，也兼顾应用。书的前四章是有关概率论、度量和积分、概率空间、条件期望和经典极限定理；接下来的章节是有关鞅、泊松随机测度、levy过程、布朗运动和马尔科夫过程。重点强调了泊松随机测度，及其在调节布朗运动冲程和Levy跃迁和马尔科夫过程中的扮演的重要角色。每章末都有大量的例子和练习。

书籍目录

- Preface
- Frequently Used Notation
 - Measure and Integration
- 1 Measurable Spaces
- 2 Measurable Functions
- 3 Measures
- 4 Integration
- 5 Transforms and Indefinite Integrals
- 6 Kernels and Product Spaces
 - Probability Spaces
- 1 Probability Spaces and Random Variables
- 2 Expectations
- 3 LP—spaces and Uniform Integrability
- 4 Information and Determinability
- 5 Independence
 - Convergence
- 1 Convergence of Real Sequences
- 2 Almost Sure Convergence
- 3 Convergence in Probability
- 4 Convergence in L_p
- 5 Weak Convergence
- 6 Laws of Large Numbers
- 7 Convergence of Series
- 8 Central Limits
 - Conditioning
- 1 Conditional Expectations
- 2 Conditional Probabilities and Distributions
- 3 Conditional Independence
- 4 Construction of Probability Spaces
- 5 Special Constructions
 - Martingales and Stochastics
- 1 Filtrations and Stopping Times
- 2 Martingales
- 3 Martingale Transformations and Maxima
- 4 Martingale Convergence
- 5 Martingales in Continuous Time
- 6 Martingale Characterizations for Wiener and Poisson
- 7 Standard Filtrations and Modifications of Martingales
 - Poisson Random Measures
- 1 Random Measures
- 2 Poisson Random Measures
- 3 Transformations
- 4 Additive Random Measures and Lévy Processes
- 5 Poisson Processes
- 6 Poisson Integrals and Self-exciting Processes
 - Lévy Processes
- 1 Introduction

《概率和随机 (英文影印版)》

- 2 Stable Processes
- 3 Levy Processes on Standard Settings
- 4 Characterizations for Wiener and Poisson
- 5 Ito—Levy Decomposition
- 6 Subordination
- 7 Increasing Levy Processes
 - Brownian Motion
- 1 Introduction
- 2 Hitting Times and Recurrence Times
- 3 Hitting Times and Running Maximum
- 4 Wiener and its Maximum
- 5 Zeros , LocalTimes
- 6 Excursions
- 7 Path Properties
- 8 Existence
 - Markov Processes
- 1 Markov Property
- 2 Ito Diffusions
- 3 Jump—Diffusions
- 4 Markov Systems
- 5 Hunt Processes
- 6 Potentials and Excessive Functions
- 7 Appendix : Stochastic Integration
- Notes and Comments
- Bibliography
- Index
