《Computational Scienc》

图书基本信息

书名：《Computational Science and Its Applications - ICCSA 2005, Part II(计算机科学及其应用—ICCSA 2005 /会议录 第II部分)》

13位ISBN编号：9783540258612

10位ISBN编号：3540258612

出版时间：2006-6-1

出版社：Springer

作者：Gervasi,Osvaldo

《Computational Scienc》

内容概要

The four-volume set LNCS 3480-3483 constitutes the refereed proceedings of the International Conference on Computational Science and Its Applications, ICCSA 2005, held in Singapore in May 2005.

The four volumes present a total of 540 papers selected from around 2700 submissions. The papers span the whole range of computational science, comprising advanced applications in virtually all sciences making use of computational techniques as well as foundations, techniques, and methodologies from computer science and mathematics, such as high performance computing and communication, networking, optimization, information systems and technologies, scientific visualization, graphics, image processing, data analysis, simulation and modelling, software systems, algorithms, security, multimedia etc.

《Computational Scienc》

书籍目录

Approaches or Methods of Security Engineering Workshop
Implementation of Short Message Service System to Be Based Mobile Wireless Internet
Fuzzy Clustering for Documents Based on Optimization of Classifier Using the Genetic Algorithm
P2P Protocol Analysis and Blocking Algorithm
Object Modeling of RDF Schema for Converting UML Class Diagram
A Framework for Security Assurance in Component Based Development
Security Framework to Verify the Low Level Implementation Codes
A Study on Evaluation of Component Metric Suites
The K-Means Clustering Architecture in the Multi-stage Data Mining Process
A Privacy Protection Model in ID Management Using Access Control
A Time-Variant Risk Analysis and Damage Estimation for Large-Scale Network Systems
Efficient Multi-bit Shifting Algorithm in Multiplicative Inversion Problems
Modified Token-Update Scheme for Site Authentication
A Study on Secure SDP of RFID Using Bluetooth Communication
The Semantic Web Approach in Location Based Services
SCTE: Software Component Testing Environments
Computer Security Management Model Using MAUT and SNMP
Session and Connection Management for QoS-Guaranteed Multimedia Service Provisioning on IP/MPLS Networks
A GQS-Based Adaptive Mobility Management Scheme Considering the Gravity of Locality in Ad-Hoc Networks
A Study on the E-Cash System with Anonymity and Divisibility
An Authenticated Key Exchange Mechanism Using One-Time Shared Key
Creation of Soccer Video Highlight Using the Caption Information
The Information Search System Using Neural Network and Fuzzy Clustering Based on Mobile Agent
A Security Evaluation and Testing Methodology for Open Source Software Embedded Information Security System
……
Information Security and Hiding(ISH 2005)Workshop
Modeling of Location Management in Mobile Information Systems Workshop
Intelligent Multimedia Services and Synchronization in Mobile Multimedia Networks Workshop
Ubiquitius Web Systems and Intelligence Workshop
Modelling Complex Systems Workshop
Author Index
