《血管和介入放射学原理与实践Vascul》

图书基本信息

- 书名:《血管和介入放射学原理与实践Vascular and Interventional Radioology》
- 13位ISBN编号:9780865776784
- 10位ISBN编号:0865776784
- 出版时间:2002-4
- 出版社: Oversea Publishing House
- 作者: Bakal, Curtis W. (EDT)/ Silberzweig, James (EDT)/ Cynamon, Jacob (EDT)/ Sprayregen, Seymour (EDT)
- 页数:480

内容概要

Written by a team of distinguished contributors actively involved in training programs, the new book offers a unique problem-solving approach to interventional radiology for residents and fellows alike. The book begins with an introduction to general techniques and goes on to provide a systems approach to diagnosis and management. Dozens of representative cases have been included. References have been limited to include only the most state-of-the-art information, and the book is packed with radiographs, CT images, and clear line drawings that illustrate all key points. Here is an invaluable reference and study tool for fellows and residents preparing for qualifying exams. Thorough enough to cover the field, it is also succinct enough to allow residents to digest it in a one or two month rotation

书籍目录

List of ContributorsForewordPrefaceAcknowledgmentsPART . BASIC PRINCIPLES AND TECHNIQUES

1. Vascular and Interventional Radiology: A Brief History 2. Catheters and Guidewires 3. Filming and Injection Techniques 4. An Approach to Sedation and Monitoring 5. Magnetic Resonance and Computed Tomographic Angiography 6. Clinical and Noninvasive Evaluation of Peripheral Vascular Disease 7. Vascular Recanalization Techniques 8. General Principles of Embolization and Chemoembolization 9. Organ Access Techniques: General Principles for Localization, Drainage, and Stenting 10. Percutaneous Needle Biopsy and Drainage 11. Radiologic Gastrostomy and Gastrojejunostomy 12. Radiation Protection 13. Physician Health and Safety in the Angiography SuitePART . A SYSTEMS APPROACH TO DIAGNOSIS AND MANAGEMENT 14. Vascular Anatomy above the Diaphragm 15. Pulmonary and Bronchial Arteries 16. Diseases of the Thoracic Aorta 17. Thoracic Outlet and Upper Extremities 18. Carotid, Vertebral, and Spinal Arteriography 19. Vascular Anatomy below the Diaphragm 20. Atherosclerotic Disease of the Aorta, Pelvis, and Lower Extremities 21. Venous Thromboembolic and Vena Cava Filters 22. Anatomy of the Kidneys and Genitourinary Tract 23. Vascular Manifestations of Renal Disease 24. Obstructive Uropathy and Renal Calculus Disease 25. Pelvic and Obstetric Hemorrhage 26. Pudendal Arteriography 27. Varicocele and Female Infertility 28. Anatomy of the Gastrointestinal Tract, Liver, and Biliary System 29. Interventional Management of Gastrointestinal Strictures 30. Nonvariceal Upper GI Bleeding 31. Liver and Spleen 32. The Biliary Tree and Pancreas 33. Vascular Diseases of the Lower Gastrointestinal Tract 34. Arteriography and Venous Sampling of the Parathyroid Glands, Pancreas, and Adrenal Glands 35. Central Venous Access 36. Hemodialysis Access ManagementIndex
