

《Euro-Par 2004 Parall》

图书基本信息

书名：《Euro-Par 2004 Parallel Processing 2004 Euro-Par并行处理国际会议/会议录》

13位ISBN编号：9783540229247

10位ISBN编号：3540229248

出版时间：2004-8-19

出版社：Springer

作者：Danelutto, Marco; Vanneschi, Marco; Laforenza, Domenico

页数：1084

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

内容概要

This book constitutes the refereed proceedings of the 10th International Conference on Parallel Computing, Euro-Par 2004, held in Pisa, Italy in August/September 2004. The 122 revised papers presented together with 3 invited papers were carefully reviewed and selected from 352 submissions. The papers are organized in topical sections on support tools and environments, performance evaluation, scheduling and load balancing, compilers and high performance, parallel and distributed databases, grid and cluster computing, applications on high performance clusters, parallel computer architecture and ILP, distributed systems and algorithms, parallel programming, numerical algorithms, high performance multimedia, theory and algorithms for parallel computing, routing and communication in interconnection networks, mobile computing, integrated problem solving environments, high performance bioinformatics, and peer-to-peer and Web computing.

书籍目录

Invited Talks Building Grid Applications and Portals:An Approach Based on Components, Web Services and Workflow Tools Maintaining Thousands of In-Flight Instructions Some Techniques for Automated, Resource-Aware Distributed and Mobile Computing in a Multi-paradigm Programming System Why Structured Parallel Programming Matters

Topic 1: Support Tools and Environments Topic 1: Support Tools and Environments. Profiling and Tracing OpenMP Applications with POMP Based Monitoring Libraries Efficient Pattern Search in Large Traces Through Successive Refinement DRAC: Adaptive Control System with Hardware Performance Counters Reproducible Network Benchmarks with coNCEPTUAL Optimizing Cache Access: A Tool for Source-to-Source Transformations and Real-Life Compiler Tests Detecting Data Races in Sequential Programs with DIOTA A Time-Coherent Model for the Steering of Parallel Simulations MATE: Dynamic Performance Tuning Environment Imprecise Exceptions in Distributed Parallel Components

Topic 2: Performance Evaluation Topic 2: Performance Evaluation Overhead Compensation in Performance Profiling A Data Structure Oriented Monitoring Environment for Fortran OpenMP Programs An Approach for Symbolic Mapping of Memory References Impact of Cache Coherence Models on Performance of OpenMP Applications Evaluating OpenMP Performance Analysis tools with the APART Test Suite Collective Communication Performance Analysis Within the Communication System Understanding the Behavior and Performance of Non-blocking Communications in MPI Generation of Simple Analytical Models for Message Passing Applications Parallel Hybrid Particle Simulations Using MPI and OpenMP Distributed Shared Memory: To Relax or Not to Relax?

Topic 3: Scheduling and Load Balancing Topic 4: Compilers for High Performance

Topic 5: Parallel and Distributed Databases, Data Mining and Knowledge Discovery

Topic 6: Grid and Cluster Computing

Topic 7: Applications on High Performance Computers

Topic 8: Parallel Computer Architecture and ILP

Topic 9: Distributed Systems and Algorithms

Topic 10: Parallel Programming: Models, Methods and Languages

Topic 11: Numerical Algorithms

Topic 12: High Performance Multimedia

Topic 13: Theory and Algorithms for Parallel Computation

Topic 14: Routing and Communication IN Interconnection Networks

Topic 15: Mobile Computing

Topic 16: Integrated Problem Solving Environments

Topic 17: High Performance Bioinformatics

Topic 18: Peer-to-Peer and Web Computing
