内容概要

This book constitutes the thoroughly refereed post-proceedings of the 6th International Bi-Conference Workshop on Agent-Oriented Information Systems, AOIS 2004, held in Riga, Latvia in June and in New York, NY, USA in July 2004. The 15 revised full papers presented have gone through two rounds of reviewing and improvement and were selected from an initial total of 36 submissions. The papers are organized in topical sections on information systems, analysis and modeling, methodologies, and applications.

书籍目录

Information Systems An Agent-Based Collaborative Emergent Process Management System Mobeet: A Multi-agent Framework for Ubiquitous Information Systems The Analysis of Coordination in an Information System Application - Emergency Medical Services Market-Based Recommender Systems: Learning Users' Interests by Quality Classification Analysis and Modeling SNet Reloaded: Roles, Monitoring and Agent Evolution Analyzing Multiparty Agreements with Commitments Fact-Oriented Meets Agent-Oriented Towards Ontological Foundations for Agent Modelling Concepts Using the Unified Foundational Ontology (UFO) Methodologies AgentZ: Extending Object-Z for Multi-agent Systems SDecification Incorporating Elements from the Prometheus Agent-Oriented Methodology in the OPEN Process Framework A Preliminary Comparative Feature Analysis of Multi-agent Systems Development Methodologies Applications CM Radar: A Personal Assistant Agent for Calendar Management Agents as Catalysts for Mobile Computing A Systematic Approach for Including Machine Learning in Multi-agent Systems Agents to Foster Conscious Design and Reuse in Architecture Author Index
