

《第三届电力解管制重构和电力技术埂

图书基本信息

书名：《第三届电力解管制重构和电力技术国际会议论文集（共3册）》

13位ISBN编号：9787564112493

10位ISBN编号：7564112492

出版时间：2008-9

出版社：东南大学、SOUTHEAST UNIVERSITY 东南大学出版社 (2008-09出版)

页数：1778

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

《第三届电力解管制重构和电力技术埂

内容概要

《第三届电力解管制重构和电力技术国际会议论文集》介绍了会议的基本信息、前言、会议528篇论文全文。供广大读者参考。《第三届电力解管制重构和电力技术国际会议论文集》由东南大学编著。

书籍目录

Panel 1 Market-Based Power System Planning Sensitivity of LMP Using an Iterative DCOPF Model Rui Be and Fangxing Li
A Simulation Tool for Calculating Energy Prices in Competitive Electricity Markets Xiaokang Xu, Derek W. Lane and Michael J. S. Edmonds
An Overview of PJM Energy Market Design and Development Zhenyu Fan, Tim Horger, Jeff Bastian and Andrew Ott
Economic Assessment of HVDC Project in Deregulated Energy Markets Shu Wang, Jinxiang Zhu, Lan Trinh and Jiuping Pan
Implementation Security Check with East China Power Market Liang Wang, Dexing Wang and Jian Zhou
Comparison of LMP Simulation Using Two DCOPF Algorithms and the ACOPF Algorithm Rui Be and Fangxing Li
Panel 2 Power System Modeling Toward Practicality
Eigenvector Selection in Load Classification and Model Generalization Xiaoyu Zheng, Jin Ma and Renmu He
Load Modeling in China—Research, Applications & Tendencies Ping Ju and Yong Tang
Detailed Modeling for Large Scale Wind Power Installations—A Real Project Case Study Nayeem R. Ullah, Ake Larsson, Andreas Petersson and Daniel Karisson
Modeling and Control of the Wind Turbine with the Direct Drive Permanent Magnet Generator Integrated to Power Grid Feng Wu, Xiaoping Zhang and Ping Ju
Panel 3 Electricity Markets: From Theory to Practice
New Entries in the Electricity Market: Choosing the Best Location for a New Generating Unit A. G. Petoussis, S. G. Petoussis, X. -P. Zhang and K. R. Godfrey
Ancillary Service Market Design and Implementation in North America: From Theory to Practice Kwok W. Cheung
Modeling Market Power in Absence of Historical Information: the Conjectural Response Approach J. Barquin
Status of Russian Power Sector Liberalization S. L. Palamarchuk, M. A. Lamoureux and N. L. Voropai
Forward Trading for an Electricity Producer A. J. Conejo, R. Garcia-Bertrand and M. Carrion
From Smart Grids to an Energy Internet: Assumptions, Architectures and Requirements L. H. Tsoukalas and R. Gao
Design of the Electricity Market Monitoring System C. Gao, E. Bompard, R. Napoli and J. Zhou
Optimal Bidding in a Multi-Period Electricity Spot Market E. V. Beck, R. Cherkaoui and A. Germond
Panel 4 FACTS and HVDC Applications
A Vision of Electricity Network Congestion Management with FACTS and HVDC Xiaoping Zhang and Liangzhong Yao
Sensitivity Formulation in a Multi-Functional FACTS Controller Training Simulator Xinghao Fang, Joe H. Chow, Abdel-Aty Edris, Xia Jiang, Bruce Fardanesh and Edvina Uzunovic
Coordinated Wide Area Control of FACTS for Congestion Management C. Rehtanz and U. Hager
A Novel Active Damping Control of TCSC for SSR Suppression in a Radial Corridor Qianjin Liu, Changchun Zhou, Lennart, Ångquist and Christian Rehtanz
Panel 5 PMU and its Application
Deploying a Large-Scale PMU System for the Brazilian Interconnected Power System Rui M. Moraes, Hector A. Ft. Volskis and Yi Hu
Progresses in PMU Testing and Calibration Yi Hu and Damir Novosevich
Wide Area Measurement & Control System in Mexico Enrique Martfnez Martinez
Panel 6 New Issues on Reliable Operation of Power Markets and Systems under New Environment in Asian Country
Restructuring the Electricity Industry and Emerging Issues in Japan Hiroshi Asano
New Issues on Reliable and Efficient Operation of the National Electricity Market of Australia Zhao Yang Dong, Kit Po Wong, Xun Zhou and Carla Ziser
An Autonomous Agent for Reliable Operation of Power Market and Systems Including Microgrids T. Funabashi, T. Tanabe, T. Nagata and R. Yokoyama
Power Electronics Technologies for Reliable Operation of Power Systems in Japan J. Arai and T. Funabashi
Optimal Allocation of SVCs Against Fluctuation of Wind Power Generators Y. Hida, If. Iba and R. Yokoyama
Ensuring Reliable System Operation in Market Environment. the Japanese Approach Y. Tsukamoto, M. Marmiroli and R. Yokoyama
Analyzing the Effect of Electric Power Industry Reforms in Korea Yong Tae Yoon, Sun-kyo Kim, Ho.chul Lee and Jong,keun Park
Track I Market, Policies and Economics
The Online Security Forewarning of Power System in Allusion to Specific Natural Disasters Zhenguo Shao, Daoshan Huang, Han Lin and Jian Kang
The Design of the French Power Market O. Lavoine and A. Taccoen
Day Ahead Clearing Algorithm & Its Application for East China Electric Power Market Zhaoqiang Ge, Dexing Wang, Libing Yang, Minhui Ge and Liang Wang
Locational Marginal Price of East China Electric Power Market Zhaoqiang Ge, Minhui Ge, Libing Yang and Dexing Wang
Security Constrained Unit Commitment for East China Electric Power Market Zhaoqiang Ge and Ying Cao
Load Settlement Rules—An Important Element in Electricity Market Settlement Raymond S. Lee and M. Sc.
Volatility Analysis on Electricity Price by Wavelet Analysis Hua Zheng, Li Xie and Lizi Zhang
Price-Load Elasticity Analysis by Hybrid Algorithm Yi Wang
Application of Genetic on Analysis of Market Equilibrium Strategy with Game Theory Zhenglin Yang and Guoqing Tang
Credit Assessment in the Electricity

《第三届电力解管制重构和电力技术埂

Market by Least Squares Support Vector Machines Hua Zheng, Li Xie and Uzi Zhang
Analysis of Supply Function Equilibrium in Electricity Markets with Financial Options Contracts Ruiqing Wang, Yuzeng Li and Shaohua Zhang
Research on Based Assessment Method of Power System Black-start Effective Schemes of Ancillary Services Shunmin Yue, Jiancheng Yu and Baoquan Liang
A Method of Reducing Constraint of Price Regulation Information Asymmetry in Electricity Distribution Market.....Others
