《MRCs基础科学》

内容概要

This title is directed primarily towards health care professionals outside of the United States. It is a concise revision guide to the core basic sciences for all surgical trainees preparing for the MRCS examination. Covering anatomy, physiology and pathology it concentrates on the recurring themes of these topics in the examination and emphasises the essential knowledge required by the candidate. It is designed for rapid revision prior to sitting the examination, written in an accessible style and indicating the clinical relevance of the topics.
