

《生态学》

图书基本信息

书名：《生态学》

13位ISBN编号：9787030109583

10位ISBN编号：7030109589

出版时间：2003-1

出版社：科学出版社

作者：麦肯齐

页数：339

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

《生态学》

内容概要

《生态学(影印本先锋版)》是“现代生物学精要速览”《生态学》的第二版。新版内容全面更新，易于学生学习和应试。

书籍目录

Abbreviations Preface Section A-Introduction to ecology A1 What is ecology? A2 Ten rules in ecology
 Section B-Adaptation to the environment B1 Adaptation B2 Coping with environmental variation
 B3 The niche Section C-Climate C1 Solar radiation and climate C2 Microclimate Section D-Water D1
 The properties of water D2 Plants and water D3 Animals and water Section E-Temperature E1
 Temperature and metabolism E2 Responses to temperature E3 Temperature and species
 distribution Section F-Radiation F1 Solar radiation and plants Section G-Nutrients G1 Sources and cycles
 G2 Plants and consumers G3 Soil formation, properties and classification Section H-Population ecology
 H1 Populations and population structure H2 Natality, mortality and population structure H3 Density and
 density dependence H4 Population dynamics-fluctuations, cycles and chaos Section I-Competition I1 The
 nature of competition I2 Intraspecific competition I3 Resource partitioning Section J-Predation J1 The
 nature of predation J2 Predator behavior and prey response Section K-Parasitism K1 The nature of
 parasitism K2 The dynamics of parasitism Section L-Mutualism L1 Mutualism Section M-Life history
 patterns M1 Life history Section N-Behavioral ecology N1 Social groups, cooperation and altruism N2
 Sex in ecology Section O-Population genetics O1 Genetic variation O2 Speciation Section P-Ecosystem
 processes P1 Components and processes P2 Primary and secondary production P3 Food chains Section
 Q-Communities Q1 The community, structure and stability Q2 Island communities and colonization
 Q3 Community patterns, competition and predation Section R-Community dynamics R1 Succession R2
 Community responses to disturbance Section S-Biomes S1 Ecosystem patterns S2 Grasslands S3 Tundra
 S4 Forests S5 Deserts, semi-deserts and shrubland S6 Saltwater biomes S7 Freshwater biomes Section
 T-Harvesting T1 Harvesting theory T2 Fishing and whaling Section U-Pest control U1 The pest
 problem and control strategies U2 Pesticides and problems U3 Biological control and integrated pest
 management Section V-Conservation V1 Rare species, habitat loss and extinction V2 Conservation
 strategies V3 Biological resources and gene banks Section W-Pollution and global warming W1 Air, water
 and soil pollutants W2 Greenhouse gases and global warming W3 Ozone Section X-The ecology of
 agriculture X1 Soil erosion and agriculture X2 Nutrient, water and energy use Further reading Index

《生态学》

精彩短评

- 1、喜欢影印的书，就是还是贵。
- 2、晕，这本书的印刷纸张实在是太差了点，我想退货！
- 3、重要的生态学原理都有涵盖。语言精练，没事时候可以读一小段，感觉不错。
- 4、不错。标题是精要速览系列，但是详略得当，能够对生态学的基础了解一二。另外还涉及了地球科学、植物生理学等部分知识。开学后被紧张的学习打断了，暂时不续
- 5、喜好者买吧
- 6、本科时参考书，买了英文原版的，也读过影印版的，此书非常具有启发性，很值得入门级同学。
- 7、压了一个好大的摺~~算了，就这样吧。。
