《Current Endovascular》

内容概要

Rupture of an abdominal aortic aneurysm is one of the leading causes of death. The risk of rupture has been a controversial topic for years and only recently have population-based studies provided better evidence for clinical management. This book includes material by an internationally renowned group of authorities directed by a prominent vascular surgeon at Mayo Clinic. The contents represent a well-balanced clinical endovascular approach to the exciting area of vascular medicine and surgery. "We are living in a period of exciting transformation. The message for anyone interested in the treatment of vascular disease is to embrace the new endovascular techniques - learn them and improve them. This is the beginning of a new era." A. G. Hakaim

作者简介

Dr. Albert G. Hakaim, MD, FACS. Consultant, Section of Vascular Surgery and Director, Endovascular Surgery, Mayo Clinic, Jacksonville, Florida; Associate Professor of Surgery, Mayo Clinic College of Medicine, Rochester, Minnesota.

书籍目录

Contributors Acknowledgments Introduction Part I Preoperative and operative considerations 1 Long-term outcome following open repair of abdominal aortic aneurysms 2 Durability of endovascular repair of infrarenal aortoiliac aneurysms: what lessons have been learned? 3 Imaging techniques and protocols for endovascular repair of abdominal aortic aneurysms 4 Essential operating room equipment, personnel, and catheter inventory for endovascular repair of abdominal aortic aneurysms 5 Essential interventional suite design, equipment, and personnel for endovascular repair of abdominal aortic aneurysms 6 Diagnosis, management, and prevention of atheroembolization and contrast media-induced renal insufficiency during endovascular repair of abdominal aortic aneurysms 7 Anesthetic management for endovascular repair of abdominal aortic aneurysms Part II Commercially available stent graft systems 8 Commercially available endovascular stent grafts 9 Ancure endograft 10 AneuRx stent graft system 11 Excluder bifurcated endoprosthesis system 12 Zenith AAA endovascular graft 13 PowerLink stent graft system Part III Investigational stent graft devices 14 Lifepath AAA bifurcated graft system 15 Talent LPS endoluminal stent graft 16 Balloon-expandable stent and polytef-based endograft for repair of complex and ruptured abdominal aortic aneurysms 17 Custom Dacron-stainless steel stent grafts Part IV Intraoperative ancillary procedures 18 Use of intravascular ultrasonography in endovascular intervention 19 Intentional occlusion of the internal iliac artery to facilitate endovascular repair of aortoiliac aneurysms 20 Arterial access for endovascular aneurysm repair 21 Ancillary interventions to provide proximal and distal endograft fixation 22 Prevention, diagnosis, and management of endoleaks Part V Appendix Reporting standards for endovascular aneurysm repair, 261 Index,
