章节摘录

版权页：插图：（1）New construction in general refers to newly constructed enterprises, institutions, administrative agencies or Independent projects from scratch. Construction in the existing enterprises, institutions or agencies is not considered as new construction. In case the assets of the existing unit is quite small, and the value of newly added fixed assets exceeds the original value of assets by three times, the expansion will be considered as new construction.（2）Expansion refers to construction of new major production workshop, branch factory or independent production line within a factory or in other locations, for the purpose of increasing the production capacity（or improving efficiency）of the original products. Newly constructed houses for the operation of institutions and administrative organizations（such as the newly constructed buildings for teaching in schools, buildings for clinics or wards in hospitals, etc.）are also classified as expansion. Also included in the expansion are investments by existing enterprises or institutions in building major production line（s）or branch factory（ies）along with some work on innovation, for the purpose of expanding the production capacity of original products or producing new products.（3）Reconstruction refers to construction projects by existing enterprises or institutions in innovation or technical transformation of the old facilities（including auxiliary production equipment and welfare facilities）. Also considered as reconstruction is the construction of new workshops by the existing enterprises or institutions to change the variety of products to meet the market demand（such as the production of civil products by, defeffce industries）, or to bring the designed production capacity into full play through a more balanced production process on production lines. Technical transformation refers to replacement of old technology or equipment by new technology or equipment, in order to expand the reproduction through improvement of technology contents in production, to improve product quality, to promote new products, to save energy and reduce consumption and to improve overall social-economic efficiency. Contents of technical transfor0ation include: updating of machinery, equipment and tools; reforming production process by using energy or materials saving technology; construction of factory workshops and transformation of public facilities; improvement of working conditions and environment, etc.
