# 《侏罗纪公园的恐龙是怎样建成的》

## 内容概要

For the millions fascinated by "Jurassic Park and "The Lost World"--and for all those young and old who have a secret love affair with dinosaurs--this second book in the series that began with "The Physics of Star Trek" brings the far-reaching imaginings of dinosaur creation into the very real world of cutting-edge science and DNA. 25 photos. Index.

## 作者简介

ROB DESALLE is associate curator at the American Museum of Natural History in New York City. In 1992, he isolated what was then the oldest known fragment of DNA. Physicist DAVID LINDLEY, a former editor at both Science and Nature magazines and now and editor at Science News, is the author of The End of Physics and Where Does the Weirdness Go?
