## 内容概要

Examination Medicine is a very successful and highly used book among FRACP candidates preparing for the Royal Australasian College of Physicians Part 1 Examination. The book is also widely used by senior medical students throughout Australia, New Zealand and South East Asia. The new 5th edition will be significantly updated in order to keep up with changes in the examinations and medicine. Examination Medicine 5E will continue to highlight key facts the candidate must understand for the fellowship examination, filled with information about history taking, the examination and investigations it will remain significant to those undertaking the FRACP examination process. The book will consist of Long and Short cases with updates to occur throughout. A new chapter on Imaging for the Physician Trainee is introduced. Written by two well-known and respected authors, Clinical Examination 5th edition will continue to provide students with a good reference point for performing clinical methods. Now in 2-colour New design of overall layout offering greater accessibility for readers. New artwork to enhance the format New Chapter on Imaging for the Physician.

## 书籍目录

Foreword Preface Acknowledgments An historical note Chapter 1 Basic training requirements The future Chapter 2 The written examination The examination format Approaching multiple-choice questions Preparation for the written examination Chapter 3 Suggested topics for the written examination Introduction Important topics for the written examination Chapter 4 An approach to the clinical examination The examination format Preparation for the clinical examination Chapter 5 The long case Chapter 6 Common long cases  
 Cardiovascular system Ischaemic heart disease Revascularisation Infective endocarditis
