《QUAKES 地震》

内容概要

San Francisco. Los Angeles. Tokyo. Anchorage. These four cities have all been walloped by major earthquakes. One city was hit back in 1906, another as recently as 1994. No matter when a big earthquake hits, it brings with it mass destruction. This engrossing Step 4 book shows us how earthquakes happen and how things changed in those cities forever. Includes fascinating historical photographs.
