《牛津英语教学参考（上海版）》

内容概要

《牛津英语教学参考:7年级第1学期(上海版)》主要内容：Comprehensive lesson notes are interleaved with the relevant Student's Book pages. This gives teachers a clear indication of how to progress through the Student's Book at a pace appropriate to the class in general and to particular individuals. Each page starts with a simple checklist containing the language to be introduced and used, the Dimension targets covered by the lesson (s) , what the teacher should prepare in order to teach successfully, and the materials required to carry out the tasks and/or activities.

《牛津英语教学参考（上海版）》

书籍目录

Introduction
Description of the materials
The approach
Task-based learning

Unit 4 Signs and rules
More oral practice
Projects
Project 1
Project 2
Project 3

章节摘录

1 Review vocabulary items about the sea animals and plants on the previous page to help students refresh their memories. Re-use the pictures about sea plants and animals in the ocean in the last lesson and introduce new vocabulary items, such as starfish, sea horses and seaweed. 2 Play the recording: Look and learn. Students listen, follow in their books and repeat after each sentence. 3 Have students work in small groups to discuss things people can get from the ocean. Write down several questions on the board for students to think about: Where do we find water ? , What can we find in the oceans ? , How can we get drinking water from sea water ? Ask these questions and encourage students to answer orally. While-task procedure 1 Have students look at page 49 of the Students Book. Ask them to discuss and find the answers to the questions on the quiz card by referring to the above reading passage. 2 A class competition: Each group selects a representative to be the spokesman for their group. Invite a student to come forward and ask the representatives the five questions on the quiz card. The representative who raises his/her hand the quickest is given a turn to answer the question. One point is scored for each correct answer. Deduct one point from the group if the answer is wrong. The group with the highest score is the winning team. Ask students to correct their answers if they got them .wrong at the beginning.
