《妇科细胞学Gynecologic》

内容概要

Both an atlas and a practical textbook, "Gynecologic Cytology" is designed to improve and enhance the practitioner's knowledge of all facets of the cellular diagnosis of gynecologic disease. Comprehensive coverage, brilliantly illustrated: More than 750 color photographs and diagrams make this book wide-ranging and easy to use. Following an overview of normal morphology are illustrated, multifaceted discussions of both benign and malignant changes, with each organ-specific discussion including results obtained from supplemental diagnostic methods. Other highlights include detailed presentations of differential diagnoses and explanations of the various consequences of specific pathological findings. Ideal for both laboratory and clinic: Bridging the gap between two often-separate spheres, the text also offers a wealth of practical advice: how best to collect, process, and ship specimens; information on analyzing smears and documenting the findings; and on quality assurance and efficient work procedures. Essential for pathologists, laboratory assistants, gynecologists, and students, "Gynecologic Cytology" is unparalleled in both its scope and its usefulness as a learning aid and reference.

书籍目录

1 History of Gynecological Cytology Founding Period Pioneer Period Consolidation Period
2 Normal Morphology of the Female Genital Tract. Portio and Vagina Endocervix Ovary Vulva
3 Benign Changes of the Female Genital Tract Portio and Vagina Physiological Changes Cytolysis Degeneration Technical Factors
Abnormal Microbiology Mixed Flora Cocci Gardnerella Chlamydia Leptothrix Actinomyces
Candida Spermatozoa Trichomonads Herpes Simplex Virus Human Papillomavirus Vaginitis Acute
Phase Chronic Phase Regenerative Phase Therapy Vaginal Adenosis Endocervix Degeneration Cervicitis
Acute and Chronic Phases Regenerative Phase Follicular Cervicitis Tubal Metaplasia Microglandular
Hyperplasia Cervical Polyps Therapy Endometrium Degeneration Endometritis Macroscopy Histology
Cytology Endometrial Atrophy Endometrial Polyps Glandular (Simple) Endometrial Hyperplasia Therapy
Ovary Degeneration Salpingitis and Ovarian Cysts Therapy Vulva Degeneration Vulvitis Vulvar Dystrophy
Vulvar Condylomas Therapy
4 Malignant Changes of the Female Genital Tract
5 Differential Cytology
6 Specimen Collection and Processing
7 Analysis and Efficiency
