# 《眼科学复习》

## 内容概要

This new resource provides an efficient review of all of the most essential clinical and scientific information in ophthalmology. Its concise, well-illustrated, outline-formatted chapters permit rapid mastery of the material. Questions at the end of each chapter and answers at the end of the book allow readers to test their understanding. \* An organization by common ophthalmologic subspecialties offers a logical approach to a wide spectrum of topics. \* Numerous tables and mnemonics facilitate learning and retention. \* A special section reviews the findings of many important clinical studies with which ophthalmologists are expected to be familiar. \* Hundreds of line illustrations and photographs (50 in full color) highlight anatomic details, common ophthalmic tests, and examples of classic histopathology. \* Selected references for each chapter facilitate further study of any given topic. \* Questions at the end of each chapter and answers at the end of the book allow readers to test their understanding.
