

《宽带高动态范围DAC》

图书基本信息

书名：《宽带高动态范围DAC》

13位ISBN编号：9787030182449

10位ISBN编号：7030182448

出版时间：2007-1

出版社：科学出版社

作者：桃瑞丝

页数：204

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

《宽带高动态范围DAC》

内容概要

《宽带高动态范围DAC(影印版)》简介：宽带高动态范围DAC是现代信息系统的基本构件。目前的电流舵DAC具有在较宽的频率范围内取得高动态性能潜力。然而，它们在更高频率时的性能被非线性限制了。宽带高动态范围DAC是解决这一缺陷的有效方法。《宽带高动态范围DAC(影印版)》的亮点在于提出了详细的方案，可以解决由失配和时钟串扰引起的时序误差，实现了12位、采样率500M、0.18微米工艺的高性能DAC。

《宽带高动态范围DAC》

书籍目录

Preface
Glossary
Abbreviations
1 Digital to Analog conversion concepts
1.1 Functional aspects
1.1.1 Definition of the D/A function
1.1.2 Functional specifications
1.2 Algorithmic aspects
1.3 Signal processing aspects
1.3.1 Waveforms and Line coding
1.3.2 Signal Modulation concepts
1.4 Circuit aspects
1.4.1 Architecture terminology
1.4.2 Resistive voltage division architectures
1.4.3 Capacitive voltage and charge division architectures
1.4.4 Current division based architectures
1.5 Conclusions
2 Framework for Analysis and Synthesis of DACs
2.1 Overview
2.2 Framework description
2.2.1 Analysis
2.2.2 Synthesis
3 Current Steering DACs
3.1 Basic circuit
3.1.1 Partitioning and segmentation
3.1.2 Current switching network and current sources
3.1.3 Clock-data synchronization circuit
3.1.4 Auxiliary circuits
3.2 Implementations and technology impact
4 Dynamic limitations of Current Steering DACs
4.1 State of the art in dynamic linearity
4.2 Dynamic limitations of current steering DACs
4.2.1 Matching and relative amplitude precision
4.2.2 Matching and relative timing precision
4.3 Conclusions
5 Current Steering DAC circuit error analysis
5.1 Amplitude domain errors
5.1.1 Relative amplitude inaccuracies
5.1.2 Output resistance modulation
5.2 Time domain errors
5.2.1 Nonlinear settling and output impedance modulation
5.2.2 Asymmetrical switching
5.2.3 Modulation of switching behavior
5.2.4 Charge feedthrough and injection
5.2.5 Relative timing inaccuracies
5.2.6 Power supply bounce and substrate noise
5.2.7 Clock (timing) jitter
5.3 Conclusions
6 High-level modeling of Current Steering DACs
6.1 System modeling
6.1.1 System layers
6.1.2 System excitations and responses
6.1.3 System parameters
6.1.4 Subsystem interaction
6.1.5 System modulation
6.2 Error properties and classification
6.2.1 Error properties
6.2.2 Error classification
6.3 Functional error generation mechanisms
6.3.1 Definitions
6.3.2 Algorithmic modeling
6.3.3 Functional modeling
6.3.4 Examples.....
7 Functional modeling of timing errors
8 Functional analysis of local timing errors
9 Circuit analysis of local timing errors
10 Synthesis concepts for CS DACs
11 Design of a 12 bit 500 Msample/s DAC
References
A Output spectrum for timing errors
B Literature data
