《大型购物中心》

内容概要

《大型购物中心》内容简介：If you are an architect, this book is a useful reference to your desired needs; if you are an voracious educator or a student involved with architecture, this is a great source book for your study; if you are an insightful businessman, you may hope to know what elements in a shopping mall environment may promote more benefit; and if you are a cultured man, you are likely to wonder, after going through a history of almost fifteen centuries, since the First mall Souq Al Hamdia was built in Old Damascus, what are the modern shopping malls like.
