《西藏》

内容概要

Countless people have long been fascinated by and dreamed about the wonderful and of Tibet in China. The author has visited Tibet 19 times within 16 years, covering almost every county, city and great number of villages, experiencing its unique traditional festivals, celebrations, religious activities and major events forging and indissoluble bond with Tibet in the process.

During each of his Tibetan journeys, the author faithfully recorded what he saw, heard and felt, sparing no effort or danger to photograph the magnificent natural scenery of Tibet's snowcoverd land, its exotic local customs and conditions, its solemn scenes of Buddhis worship. This book is based on that material, arranged as 14 topics whose fine text and lavish photography present precious moments and places that lie beyond the easy reach of ordinary people.

It is easy to have a quick look at China's past and present, but it takes time to gain a panoramic knowledge of China. The "Pan oramic China" series is meant to assist readers, especially those overseas, in this respect. Each volume in the series focuses on a province, municipality or autono mous region, describing, with illustrations, the outstanding char acteristics of each area from dif ferent perspectives.
