

# 《世界竹藤》

## 图书基本信息

书名：《世界竹藤》

13位ISBN编号：9787503851094

10位ISBN编号：7503851090

出版时间：2007-1

出版社：中国林业出版社

作者：江泽慧

页数：360

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

# 《世界竹藤》

## 内容概要

Widely distributed in Asia , Africa and Latin America , bamboo and rattan are the most important non timber forest products among the world , S plant and forest resources . These versatile plants have a great potential in povedy reduction , indust~development and sustainable development in rural areas.

# 《世界竹藤》

## 书籍目录

Foreword  
Preface  
Part I Bamboo  
Chapter 1 Introduction  
1.1 Bamboo Distribution  
1.1.1 Distribution in the World  
1.2 Distribution in China  
2. Importance of Bamboo Industry  
Chapter 2 Botanical Characters of Bamboo  
1. Introduction  
2. Morphology of Bamboo  
2.1 Vegetative Organs  
2.2 Reproductive Organs  
3. Anatomy of Bamboo  
3.1 Culm Anatomy  
3.2 Anatomy of the Node  
3.3 Anatomy of the Rhizome  
3.4 Anatomy of Leaf  
4. Taxonomy of Bamboo  
Chapter 3 Basis of Bamboo Forest Silviculture  
1. Bamboo Biology  
1.1 Rhizome Growth  
1.2 Culm Growth  
1.3 Bamboo Stand Growth  
2. Ecology of Bamboo Forest  
2.1 Biological Conditions  
2.2 Physical Conditions  
3. Physiology of Bamboo  
3.1 Bamboo Growth and Photosynthesis  
3.2 Bamboo Stand Growth and Nutrition  
Chapter 4 Establishment and Management of Bamboo Plantations in China  
1. Bamboo Propagation  
1.1 Fast Micropropagation  
1.2 Callus Culture and Plant Regeneration  
2. Nursery Stock Growing of Bamboo  
2.1 Site Selection and Preparation  
2.2 Raising Sympodial Bamboo Seedlings  
2.3 Raising Monopodial Bamboo Seedlings  
2.4 Transplanting of in Vitro Seedlings  
3. Establishment and Management of Bamboo Plantations  
3.1 Sympodial Bamboo Plantations  
3.2 Monopodial Bamboo Plantations  
Chapter 5 Conservation of Bamboo Resources and Genetic Improvement  
1. Genetic Diversity of Bamboos  
1.1 Species Diversity  
1.2 Bamboo Variations between and in Species  
2. Conservation of Bamboo Resources  
2.1 Purpose of the Conservation of Bamboo Resources  
2.2 Conservation Methods of Bamboo Resources  
3. Genetic Improvement  
3.1 Strategies for Genetic Improvement  
3.2 Estimation Test of Genetic Resources  
3.3 Criteria/Index and Method for Clones Selection  
3.4 Cross Breeding of Bamboos  
3.5 Rapid Propagation of Good Clones  
4. Breeding with Biological Techniques  
4.1 Secondary Metabolites Markers  
4.2 Protein Diversity  
4.3 DNA Genetic Markers  
Chapter 6 Management of Insect Pests and Diseases on Bamboos  
1. Summary  
1.1 Summary of Bamboo Diseases  
1.2 Summary of Bamboo Insect Pests  
2. Diseases of Bamboo  
2.1 Top Blight of Moso Bamboo  
2.2 Culm Rust  
2.3 Witches'-Broom  
2.4 Shoot Top Rot  
3. Main Herbivorous Insects of Bamboo and Their Control  
3.1 Rhizome and Root Feeders  
3.2 Shoot Sap Suckers  
3.3 Bamboo Shoot Weevils  
3.4 Root Fly  
3.5 Bamboo Shoot Flies  
3.6 Bamboo Shoot Boring Noctuids  
3.7 Defoliators  
3.8 Leaf Rollers  
3.9 Bamboo Puss Moths  
3.10 *Pantana Phyllostachysae* Chard  
3.11 Sap Suckers  
3.12 Post-Harvest Pests  
Chapter 7 Comprehensive Benefits of Bamboo Forests  
1. Bamboo Forests for Soil and Water Conservation  
2. Protective Function of Bamboo Forests  
3. Bamboo for Carbon Storage  
3.1 Bamboo Biomass and Carbon Stock  
3.2 Bamboo and Wood Carbon  
3.3 Bamboo Carbon for Development  
3.4 Adjusting Bamboo to CDM Forestry Projects  
4. Bamboo for Beautifying the Environment and Improving Living Conditions  
5. Bamboo in Rural Economic Development  
6. Bamboo Forests and Biodiversity Conservation  
7. Bamboo and the Human Civilization  
Chapter 8 Structure and Properties of Bamboo.....  
Part II Rattan Sustainable Development
