

《核电专业英语》

图书基本信息

书名：《核电专业英语》

13位ISBN编号：9787111395058

10位ISBN编号：7111395050

出版时间：2012-11

出版社：机械工业出版社

作者：谢诞梅

页数：254

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

《核电专业英语》

内容概要

谢诞梅主编的《核电专业英语》为普通高等教育“十二五”规划教材。全书分三部分，即核工程基本理论、压水堆核电站及其主要设备、反应堆新技术。20个单元广泛涉及核物理、中子物理、辐射与防护、反应堆物理、热工水力学、反应堆堆芯材料、压水堆设计特点、堆芯与核材料、压水堆冷却剂系统主要设备、汽轮机、二回路辅助设备、核电站运行、当今核电技术、第三代反应堆（AP1000，EPR）、核安全、第四代反应堆和小型反应堆等。全书共涉及约1000个生词及专业词汇，专业词汇涵盖面广、生词重复率高。每个单元包括正文、专业词汇、习题等内容。为了便于学生领会专业知识，每个单元都对重点术语进行了注释，全书后附有总词汇表，并配有习题参考答案。

《核电专业英语》可作为普通高等院校核工程与核技术专业本科和研究生的专业英语教材，也可作为核电工程技术人员的培训和自学用书，同时可作为能源动力类等相关专业人员的阅读材料。

书籍目录

前言 Part One Basic Theory Unit 1 Current Status of Nuclear Industry 1. Introduction 2. Why Is There a Renaissance in Nuclear Power Now 3. Current Status and Expansion Plans of Nuclear Power 4. Major Recent Developments 5. New Nuclear Reactor Technologies 6. Safety Concerns New Words and Expressions Special Notes Questions Unit 2 Nuclear Physics 1. Atom and Nucleus 2. Stable and Unstable Nuclides 3. Mass Defect and Binding Energy 4. Modes of Radioactive Decay 5. Radioactivity New Words and Expressions Special Notes Questions Unit 3 Neutron Physics 1. Neutron Interactions 2. Nuclear Fission 3. Energy Release from Fission 4. Neutron Sources New Words and Expressions Special Notes Questions Unit 4 Radiation Shielding 1. Nuclear Radiations 2. Radiation Effects on Materials 3. Radiation Shielding in Nuclear Reactor 4. Shielding Design 5. Shielding Materials 6. A Review of Software Resources 7. Health Physics New Words and Expressions Special Notes Questions Unit 5 Nuclear Reactor Theory 1. Nuclear Cross Sections and Neutron Flux 2. Neutron Slowing Down and Thermalization 3. Prompt and Delayed Neutrons 4. Neutron Flux Spectrum 5. Neutron Life Cycle New Words and Expressions Special Notes Questions Unit 6 Thermal Hydraulics 1. Introduction 2. Modes of Heat Transfer 3. Heat Generation 4. Boiling Heat Transfer 5. Decay Heat New Words and Expressions Special Notes Questions Unit 7 Nuclear Power Plant Core Materials 1. Overview 2. Nuclear Fuel, Uranium and Plutonium 3. Cladding Materials 4. Control Materials 5. Structural Materials 6. Coolant New Words and Expressions Special Notes Questions Part Two Pressurized Water Reactor Unit 8 Basic Design Features of a Pressurized Water Reactor 1. Introduction 2. Typical Plant Arrangement 3. Nuclear Steam Supply System (NSSS) 4. Principal Design Criteria 5. Other Related Systems New Words and Expressions Special Notes Questions Unit 9 Reactor Core and Fuel 1. Introduction 2. Reactor Core 3. Nuclear Fuel New Words and Expressions Special Notes Questions Unit 10 Main Components in PWR Coolant System 1. Steam Generator 2. Pressurizer 3. Reactor Coolant Pump New Words and Expressions Special Notes Questions Unit 11 Steam Turbine 1. Principle of Steam Turbine 2. Classification of Steam Turbines 3. Steam Turbine Construction New Words and Expressions Special Notes Questions Unit 12 Auxiliaries of the Secondary Loop 1. Introduction 2. Main Steam and By-pass System 3. Condensing System 4. Regenerative Feedwater Heating System 5. Control and Protection System of Steam Turbine New Words and Expressions Special Notes Questions Unit 13 Operation of a Nuclear Power Plant 1. The Operation Modes of NPP 2. Operating Conditions 3. Safety Limits 4. Station Control System 5. Reactor Protection System New Words and Expressions Special Notes Questions Part Three State-of-the-art of Nuclear Power Unit 14 Current Power Reactor Technologies 1. Brief Review 2. Boiling Water Reactor 3. Heavy-water-moderated Reactor 4. High Temperature Gas-cooled Reactor New Words and Expressions Special Notes Questions Unit 15 Design Features of AP1000 1. Introduction 2. Description of the Systems 3. Safety Systems and Active, Passive, and Inherent Features New Words and Expressions Special Notes Questions Unit 16 The EPR Reactor 1. Introduction 2. Systems Architecture 3. Safety Systems 4. Competitiveness New Words and Expressions Special Notes Questions Unit 17 Nuclear Safety 1. The Safety Functions of Nuclear Reactor 2. Defense in Depth 3. Safety Systems and Their Function 4. Nuclear Accidents 5. A Comparison between Three Nuclear Disasters New Words and Expressions Special Notes Questions Unit 18 International Thermonuclear Experimental Reactor 1. Introduction 2. Tokamak 3. Safety and Environmental Assessment New Words and Expressions Special Notes Questions Unit 19 Generation-IV Nuclear Power 1. Background 2. Current Status of Generation-IV Science 3. Future Advances in Generation-IV Science New Words and Expressions Special Notes Questions Unit 20 Small Nuclear Power Reactors 1. Introduction 2. Kinds of Small Nuclear Reactors 3. Traveling Wave Reactors New Words and Expressions Special Notes Questions 参考答案
