《世界上最经典的品牌》

章节摘录

desktop and portable Macintoshes for professional and consumer customers. Because of Jobs's restorative efforts, Apple exited the 1990s as a pared-down version of its former self, but, importantly, a profitable company once again. Apples turnaround was confirmed in the first years of the 21st century, as the company strode toward its 30th anniversary exuding an unprecedented degree of strength. At the heart of the company's surging growth was a digital music player branded as iPod. Introduced in late 2001, the iPod represented another example of Apples skill in designing an elegant and functional product. succeeding generations of iPods hit the market and scored resounding success, driving the company's financial growth. Between 2001 and 2005, thanks primarily to the popularity of iPods, the company's sales nearly tripled, increasing from \$5.3 billion to \$13.9 billion. Apple controlled more than 75 percent of the \$2.5 billion digital audioplayer market in the United States.

《世界上最经典的品牌》

精彩短评

1、很多品牌的迅猛发展都得益于二战，看来有时候战争并不一定是坏事。
