章节摘录

版权页：插图：The Dharma lounge has come to fruition through the exploration of using text as both structure and decoration. The purpose of this chair is to create a situation where the participant is embraced by the possibilities of creating a relationship with the object based on personal / communal experiences and memories, substantiating the Life of the product. Memories are intrinsic to human nature; we treasure these moments throughout our lives. Thus, as the individual encounters the chair and revisits the hidden text a new experiential moment is attained, for the individual mindset is different every time. The text hidden within the structural make up of this product has been chosen for its wide range of meaning and interpretation, the possibilities are endless. In our highly competitive market today there are more and more product services available to the consumer allowing them to customize a particular product to suit their own lifestyle needs. The Dharma lounge offers flexibility. Manufactured with a predetermined set of textual patterns based on preliminary human factors research; Palette Industries can also make available the possibility to the individual to work in collaboration with the designers to create a personalized piece of furniture that would grow with them evolving over time. The shell of the Dharma lounge is fabricated from water-based, water-borne, nontoxic, laminating, and casting material combined with a natural fiber as an alternative to conventional fiber glass resin applications. This particular material offers a more environmentally aware choice without the usual health risks or fumes, off gassing and intensive labor requirements generally associated with conventional or formaldehyde based resin systems. The chromed steel legs are intricately bent to the appropriate dimensions connecting in the center to a cast aluminum cross section to allow for ease of assembly and shipping.

《字体改革》

精彩短评

- 1、全新的！又划算！！！超级棒
 - 2、好图好纸好装帧
 - 3、很赞很赞~~~字体绝对是设计中很重要的一部分，让我想起去年529兔兔的“字体之美”的讲座...可惜一年多了对字体选择的驾驭还是没有轻车熟路啊~
 - 4、灵感+3
- 这本书超赞，总会给人以启发
