

# 《化学》

## 图书基本信息

书名：《化学》

13位ISBN编号：9787302305293

10位ISBN编号：7302305293

出版时间：2012-11

出版社：清华大学出版社

页数：581

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

## 前言

随着经济全球化、教育国际化趋势的逐渐增强，迫切需要既精通专业知识又精通外语的高素质人才。化学是自然科学的“中心学科”，高等化学教育应面向世界，适应时代的需要，吸收国外先进的教学理念和教育教学形式，培养学生适应国际形势需要的综合素质。为反映国外化学类教材的最新内容和编写风格，同时也为提高学生阅读专业文献和获取信息的能力，为高等学校使用英文原版教材进行双语教学服务，我们精选了国外优秀的化学类教材，组成“国外高校优秀化学教材——影印版”，本书即为其中的一册。所选教材均在国外广泛采用，多数已再版，书中不仅介绍了有关概念、原理及应用，给出了丰富的实例和数据，还反映了作者不同的学术观点。我们希望这套丛书的出版能对高等学校师生有所帮助，并对我国高等化学教育的发展做出贡献。

# 《化学》

## 内容概要

希尔、麦克里里、科尔布编著的《化学：时代行进中的科学（第12版影印版）》适合非化学专业的学生学习化学知识。全书通过当今人们感兴趣的议题来介绍化学原理，将化学问题与日常生活紧密联系，突出化学用于解决环境污染、放射性、能源以及人类健康等问题的实际应用，使学生认识到化学在现实世界的重要性。并注重培养学生掌握科学的方法，能够以批判的眼光来学习，培养对科学的兴趣。全书内容丰富生动，语言清晰易懂。

《化学：时代行进中的科学（第12版影印版）》主要内容包括：化学，原子，原子结构，化学键，化学计算，气液固态与分子间力，酸和碱，氧化与还原，有机化学，高分子，核化学，地球化学，空气，水，能源，生物化学，食品，药物，化学与健康，化学与农业，日用化学品，有毒物质。

## 书籍目录

Preface	xiv
Media Resources for Itructo	xix
To the Student	xxii
Highlights of the Twelfth Edition	xxiv
1 Chemistry	
1.1 Science and Technology: The Roots of Knowledge	2
1.2 The Baconian Dream and the Caonian Nightmare	3
1.3 Science: Reproducible, Testable, Tentative, Predictive, and Explanatory	4
1.4 The Limitatio of Science	7
1.5 Science and Technology: Risks and Benefits	8
1.6 Chemistry: Its Central Role	10
1.7 Solving Society ' s Problems: Scientific Research	11
1.8 Chemistry: A Study of Matter and Its Changes	13
1.9 Classification of Matter	16
1.10 The Measurement of Matter	19
1.11 Deity	25
1.12 Energy: Heat and Temperature	28
1.13 Critical Thinking	32
Summary	34
Review Questio	35
Problems	35
Additional Problems	38
Collaborative Group Projects	39
2 Atoms	41
2.1 Atoms: The Greek Idea	42
2.2 Lavoisier: The Law of Coervation of Mass	43
2.3 Proust: The Law of Definite Proportio	44
2.4 John Dalton: The Atomic Theory of Matter	46
2.5 Out of Chaos: The Periodic Table	51
2.6 Atoms and Molecules: Real and Relevant	53
Summary	56
Review Questio	56
Problems	57
Additional Problems	58
Collaborative Group Projects	59
3 Atomic Structure	61
3.1 Electricity and the Atom	62
3.2 Serendipity in Science: X-Rays and Radioactivity	65
3.3 Three Types of Radioactivity	66
3.4 Rutherford ' s Experiment: The Nuclear Model of the Atom	67
3.5 The Atomic Nucleus	69
3.6 Electron Arrangement: The Bohr Model	72
3.7 Electron Arrangement: The Quantum Model	77
3.8 Electron Configuratio and the Periodic Table	80
3.9 Which Model to Choose?	84
Summary	84
Review Questio	85
Problems	86
Additional Problems	86
Collaborative Group Projects	87
4 Chemical Bonds	89
4.1 The Art of Deduction: Stable Electron Configuratio	90

4.2 Lewis (Electron-Dot) Symbols	91
4.3 The Reaction of Sodium and Chlorine	92
4.4 Using Lewis Symbols: More Ionic Compounds	94
4.5 Formulas and Names of Binary Ionic Compounds	97
4.6 Covalent Bonds: Shared Electron Pairs	100
4.7 Unequal Sharing: Polar Covalent Bonds	102
4.8 Polyatomic Molecules: Water, Ammonia, and Methane	104
4.9 Polyatomic Ions	105
4.10 Rules for Writing Lewis Formulas	107
4.11 Odd-Electron Molecules: Free Radicals	110
4.12 Molecular Shapes: The VSEPR Theory	112
4.13 Shapes and Properties: Polar and Nonpolar Molecules	116
4.14 A Chemical Vocabulary	117
Summary	118
Review Questions	119
Problems	119
Additional Problems	121
Collaborative Group Projects	121
5 Chemical Accounting	123
5.1 Chemical Sentences: Equations	123
5.2 Volume Relationships in Chemical Equations	127
5.3 Avogadro's Number and the Mole	128
5.4 Molar Mass: Mole-to-Mass and Mass-to-Mole Conversions	131
5.5 Solutions	138
Summary	143
Review Questions	144
Problems	144
Additional Problems	146
Collaborative Group Projects	147
6 Gases, Liquids, Solids, and Intermolecular Forces	149
6.1 Solids, Liquids, and Gases	150
6.2 Comparing Ionic and Molecular Compounds	152
6.3 Forces between Molecules	154
6.4 Forces in Solutions	156
6.5 Gases: The Kinetic – Molecular Theory	158
6.6 The Simple Gas Laws	159
6.7 The Ideal Gas Law	165
Summary	167
Review Questions	167
Problems	168
Additional Problems	169
Collaborative Group Projects	169
7 Acids and Bases	
7.1 Acids and Bases: Experimental Definitions	172
7.2 Acids, Bases, and Salts	173
7.3 Acidic and Basic Anhydrides	179
7.4 Strong and Weak Acids and Bases	181
7.5 Neutralization	182
7.6 The pH Scale	183
7.7 Buffer and Conjugate Acid – Base Pairs	186
7.8 Acid Rain	187
7.9 Antacids: A Basic Remedy	188
7.10 Acids and Bases in Industry and in Us	189

Summary	191
Review Questions	191
Problems	191
Additional Problems	193
Collaborative Group Projects	193
8 Oxidation and Reduction	195
8.1 Oxidation and Reduction: Three Views	196
8.2 Oxidizing and Reducing Agents	200
8.3 Electrochemistry: Cells and Batteries	201
8.4 Corrosion	206
8.5 Explosive Reaction	207
8.6 Oxygen: An Abundant and Essential Oxidizing Agent	208
8.7 Other Common Oxidizing Agents	210
8.8 Some Reducing Agents of Interest	212
8.9 A Closer Look at Hydrogen	214
8.10 Oxidation, Reduction, and Living Things	216
Summary	218
Review Questions	218
Problems	219
Additional Problems	220
Collaborative Group Projects	221
9 Organic Chemistry	223
9.1 The Unique Carbon Atom	224
9.2 Alkanes	224
9.3 Cyclic Hydrocarbons: Rings and Things	229
9.4 Unsaturated Hydrocarbons: Alkenes and Alkynes	231
9.5 Aromatic Hydrocarbons: Benzene and Relatives	233
9.6 Chlorinated Hydrocarbons: Many Uses, Some Hazards	234
9.7 The Functional Group	236
9.8 The Alcohol Family	238
9.9 Phenols	241
9.10 Ethers	241
9.11 Aldehydes and Ketones	243
9.12 Carboxylic Acids	246
9.13 Ester: The Sweet Smell of RCOOR'	248
9.14 Amines and Amides	251
9.15 Heterocyclic Compounds: Alkaloids and Others	254
Summary	255
Review Questions	256
Problems	256
Additional Problems	258
Collaborative Group Projects	259
10 Polymer	261
10.1 Polymerization: Making Big Ones Out of Little Ones	261
10.2 Natural Polymer	262
10.3 Celluloid: Billiard Balls and Colla	262
10.4 Polyethylene: From the Battle of Britain to Bread	263
Bags	263
10.5 Addition Polymerization: One . One . One . á GIVES ONE	266
10.6 Rubber and Other Elastomer	271
10.7 Condensation Polymer: Splitting Out Water	273
10.8 Properties of Polymer	278
10.9 Disposal of Plastics	280
10.10 Plastics and Fire Hazards	281

- 10.11 Plasticize and Pollution 281
- 10.12 Plastics and the Future 282
- Summary 285 . Review Questio 286 . Problems 286 .
- Additional Problems 287 . Collaborative Group Projects 289
- 11 Nuclear Chemistry 291
- 11.1 Natural Radioactivity 292
- 11.2 Nuclear Equatio 294
- 11.3 Half-Life 298
- 11.4 Radioisotopic Dating 300
- 11.5 Artificial Tramutation 302
- 11.6 Uses of Radioisotopes 304
- 11.7 Penetrating Power of Radiation 308
- 11.8 Energy from the Nucleus 309
- 11.9 The Building of the Bomb 313
- 11.10 Radioactive Fallout 315
- 11.11 Nuclear Power Plants 316
- 11.12 Thermonuclear Reactio 318
- 11.13 The Nuclear Age 319
- Summary 320 . Review Questio 321 . Problems 321 .
- Additional Problems 322 . Collaborative Group Projects 323
- 12 Chemistry of Earth
- 12.1 Spaceship Earth: The Materials Manifest 325
- 12.2 The Lithosphere: Organic and Inorganic 327
- 12.3 Meeting Our Needs: From Sticks to Bricks 327
- 12.4 Silicates and the Shapes of Things 328
- 12.5 Modified Silicates: Ceramics, Glass, and Cement  
330
- 12.6 Metals and Ores 332
- 12.7 Earth ' s Dwindling Resources 337
- Summary 340 . Review Questio 341 . Problems 341 .
- Additional Problems 342 . Collaborative Group Projects 343
- 13 Air 345
- 13.1 Earth ' s Atmosphere: Divisio and Composition 345
- 13.2 Chemistry of the Atmosphere 347
- 13.3 Pollution through the Ages 350
- 13.4 Coal + Fire : Industrial Smog 352
- 13.5 Automobile Emissio 355
- 13.6 Photochemical Smog: Making Haze while the Sun Shines  
358
- 13.7 Acid Rain: Air Pollution : Water Pollution 361
- 13.8 The lide Story: Indoor Air Pollution 362
- 13.9 Ozone: The Double-Edged Sword 366
- 13.10 Carbon Dioxide and Climate Change 369
- 13.11 Who Pollutes? Who Pays? 373
- Summary 376 . Review Questio 377 . Problems 377 .
- Additional Problems 378 . Collaborative Group Projects 379
- 14 Water
- 14.1 Water: Some Unique Properties 382
- 14.2 Water in Nature 384

- 14.3 Chemical and Biological Contamination 387
- 14.4 Industrial Water Use 389
- 14.5 Groundwater Contamination : Tainted Tap Water 392
- 14.6 Making Water Fit to Drink 394
- 14.7 Wastewater Treatment 399
- 14.8 The Newest Soft Drink: Bottled Water 401
- 14.9 Water Pollution and the Future 401
- Summary 403 . Review Questio 403 . Problems 404 .
- Additional Problems 405 . Collaborative Group Projects 405
- 15 Energy 407
- 15.1 Sunlight Floods Earth with Energy 408
- 15.2 Energy and Chemical Reactio 411
- 15.3 The Laws of Thermodynamics 414
- 15.4 People Power: Early Uses of Energy 417
- 15.5 Reserves and Coumption Rates of Fossil Fuels 418
- 15.6 Coal: The Carbon Rock of Ages 419
- 15.7 Natural Gas: Mostly Methane 422
- 15.8 Petroleum: Liquid Hydrocarbo 422
- 15.9 Convenient Energy: Electricity 428
- 15.10 Nuclear Fission 430
- 15.11 Nuclear Fusion: The Sun in a Magnetic Bottle 435
- 15.12 Harnessing the Sun: Solar Energy 436
- 15.13 Biomass: Photosynthesis for Fuel 438
- 15.14 Hydrogen: Light and Powerful 441
- 15.15 Other Renewable Energy Sources 443
- 15.16 Energy: How Much Is Too Much? 445
- Summary 447 . Review Questio 448 . Problems 448 .
- Additional Problems 450 . Collaborative Group Projects 451
- 16 Biochemistry 453
- 16.1 The Living Cell 453
- 16.2 Carbohydrates: A Storehouse of Energy 455
- 16.3 Fats and Other Lipids 459
- 16.4 Protei: Polyme of Amino Acids 462
- 16.5 The Peptide Bond: Peptides and Protei 465
- 16.6 Structure of Protei 467
- 16.7 Enzymes: Exquisite Precision Machines 471
- 16.8 Nucleic Acids: Parts and Structure 474
- 16.9 DNA: Self-Replication 477
- 16.10 RNA: Protein Synthesis and the Genetic Code 479
- 16.11 The Human Genome 481
- Summary 485 . Review Questio 486 . Problems 486 .
- Additional Problems 488 . Collaborative Group Projects 489
- 17 Food 491
- 17.1 Carbohydrates in the Diet 492
- 17.2 Fats and Cholesterol 494
- 17.3 Protei: Muscle and Much More 499
- 17.4 Minerals: Inorganic Chemicals and Life 501

17.5	The Vitami: Vital, but Not All Are Amines	503		
17.6	Other Essentials: Fiber and Water	505		
17.7	Starvation and Fasting	506		
17.8	Additives to Enhance Nutrition and Taste	508		
17.9	Additives to Retard Spoilage	513		
17.10	Color Additives	515		
17.11	Poiso in Our Food	517		
17.12	A World without Food Additives	521		
	Summary	522 . Review Questio	523 . Problems	523 .
	Additional Problems	524 . Collaborative Group Projects	525	
18	Drugs			
18.1	Scientific Drug Design	528		
18.2	Pain Relieve: Noteroidal Anti-Inflammatory Drugs (NSAIDs)	529		
18.3	Chemistry, Allergies, and the Common Cold	532		
18.4	Antibacterial Drugs	534		
18.5	Viruses and Antiviral Drugs	538		
18.6	Chemicals agait Cancer	541		
18.7	Hormones: The Regurato	544		
18.8	Chemistry and Social Revolution: The Pill	549		
18.9	Drugs for the Heart	552		
18.10	Drugs and the Mind	554		
18.11	Some Chemistry of the Nervous System	554		
18.12	Brain Amines: Depression and Mania	556		
18.13	Anesthetics	559		
18.14	Depressant Drugs	562		
18.15	Narcotics	565		
18.16	Antianxiety Agents	569		
18.17	Stimulant Drugs	571		
18.18	Hallucinogenic Drugs	573		
18.19	Drug Problems	576		
	Summary	577 . Review Questio	579 . Problems	579 .
	Additional Problems	579 . Collaborative Group Projects	581	
19	Fitness and Health			
19.1	Calories: Quantity and Quality	583		
19.2	Vitami and Minerals	586		
19.3	Body Fluids and Electrolytes	589		
19.4	Weight-Loss Diets	591		
19.5	Exercise for Weight Loss	593		
19.6	Measuring Fitness	596		
19.7	Some Chemistry of Muscles	598		
19.8	Drugs and the Athlete	601		
19.9	Exercise and the Brain	603		
19.10	No Smoking	604		
	Summary	607 . Review Questio	607 . Problems	608 .
	Additional Problems	609 . Collaborative Group Projects	609	
20	Chemistry Down on the Farm . . .			
20.1	Farming with Chemicals: Fertilize	612		
20.2	The War agait Pests	618		

20.3 Biological Control	624
20.4 Herbicides and Defoliants	628
20.5 Sustainable Agriculture	630
20.6 Some Malthusian Mathematics	632
20.7 Can We Feed a Hungry World?	634
Summary	635
Review Questions	635
Problems	635
Additional Problems	636
Collaborative Group Projects	637
21 Household Chemicals	639
21.1 A History of Cleaning	640
21.2 Fat + Lye : Soap	641
21.3 Synthetic Detergents	645
21.4 Laundry Detergent Formulation	647
21.5 Dishwashing Detergents	651
21.6 Fabric Softener	651
21.7 Laundry Bleaches: Whiter Whites	652
21.8 All-Purpose Cleaning Products	653
21.9 Special-Purpose Cleaners	654
21.10 Solvents, Paints, and Waxes	658
21.11 Cosmetics: Personal Care Chemicals	659
21.12 Toothpaste: Soap with Grit and Flavor	665
21.13 Perfumes, Colognes, and Aftershave	666
21.14 Some Hairy Chemistry	669
21.15 The Well-Informed Consumer	673
Summary	674
Review Questions	675
Problems	675
Additional Problems	676
Collaborative Group Projects	677
22 Poisons	679
22.1 Natural Poisons	680
22.2 Corrosive Poisons: A Closer Look	682
22.3 Metabolic Poisons	683
22.4 Heavy Metal Poisons	684
22.5 More Chemistry of the Nervous System	688
22.6 The Lethal Dose	690
22.7 The Liver as a Detox Facility	692
22.8 Chemical Carcinogens: Slow Poisons	693
22.9 Three Ways to Test for Carcinogens	697
22.10 Birth Defects: Teratogens	698
22.11 Hazardous Wastes	699
22.12 What Price Poisons?	701
Summary	702
Review Questions	703
Problems	703
Additional Problems	704
Collaborative Group Projects	705
Appendix: Review of Measurement and Mathematics	A-1
Glossary	A-18
Answers	A-25
Photo Credits	PC-1
Index	I-1

## 章节摘录

**To the Student** Welcome to Our Chemical World! Chemistry is fun. Through this book, we would like to share with you some of the excitement of chemistry and some of the joy of learning about it. You do not need to exclude chemistry from your learning experiences. Learning chemistry will enrich your life—now and long after this course is over—through a better understanding of the natural world, the technological questions now confronting us, and the choices we must face as citizens within a scientific and technological society.

Learning chemistry involves thinking logically, critically, and creatively. Skills gained in this course can be exceptionally useful in many aspects of your life. You will learn how to use the language of chemistry: symbols, formulas, and equations. More important, you will learn how to obtain meaning from information. The most important thing you will learn is how to learn. Memorized material will quickly fade into oblivion unless it is arranged on a framework of understanding.

**Chemistry Directly Affects Our Lives** How does the human body work? How does aspirin cure headaches, reduce fevers, and perhaps lessen the chance of a heart attack or stroke? Is ozone a good thing or a threat to our health? Are iron supplement pills poisonous? Is global warming real? If so, did humans contribute to it, and what are some of the possible consequences? Why do most weight-loss diets seem to work in the short run but fail in the long run? Why do our moods swing from happy to sad? Can a chemical test on urine predict possible suicide attempts? How does penicillin kill bacteria without harming our healthy body cells? Chemists have found answers to questions such as these and continue to seek the knowledge that will unlock still other secrets of our universe. As these mysteries are resolved, the direction of our lives often changes—sometimes dramatically. We live in a chemical world—a world of drugs, biocides, food additives, fertilizers, fuels, detergents, cosmetics, and plastics. We live in a world with toxic wastes, polluted air and water, and dwindling petroleum reserves. Knowledge of chemistry will help you better understand the benefits and hazards of this world and will enable you to make intelligent decisions in the future.

**Chemical Dependency** We are all chemically dependent. Even in the womb we depend on a constant supply of oxygen, water, glucose, and a multitude of other chemicals. Our bodies are intricate chemical factories. They are durable but delicate systems. Innumerable chemical reactions that allow our bodies to function properly are constantly taking place within us. Thinking, learning, exercising, feeling happy or sad, putting on too much weight or not gaining enough, and virtually all life processes are made possible by these chemical reactions. Everything that we ingest is part of a complex process that determines whether our bodies work effectively or not. The consumption of some substances can initiate chemical reactions that will stop body functions. Other substances, if consumed, can cause permanent disabilities, and still others can make living less comfortable. A proper balance of the right foods provides the chemicals and generates the reactions we need in order to function at our best. The knowledge of chemistry that you will soon be gaining will help you better understand how your body works so that you will be able to take proper care of it. ....
