

《线性与非线性积分方程》

图书基本信息

书名：《线性与非线性积分方程》

13位ISBN编号：9787040316940

10位ISBN编号：7040316943

出版时间：2011-6

出版社：高等教育出版社

作者：瓦斯瓦茨

页数：639

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

《线性与非线性积分方程》

内容概要

《线性与非线性积分方程:方法及应用》是一本同时介绍线性和非线性积分方程的教材，分成两部分，各部分自成体系。第一部分主要对第一类、第二类线性积分方程进行了系统、深入的分析并提供各种解法；第二部分主要讲述非线性积分方程求解及其应用，针对不适定fredholm问题、分歧点和奇异点等问题进行了系统的分析，并提供易于理解的处理方法。

《线性与非线性积分方程:方法及应用》通过大量的例子讲述线性与非线性积分方程最新发展起来的高效解法，无须要求读者对抽象理论本身有很深的理解，同时也讨论了某些经典方法一些有价值的改进。书中对这些方法都给出了很好的解释，并通过对这些方法进行对比，使得读者能够快速掌握并选择可行且高效的方法。《线性与非线性积分方程:方法及应用》提供了大量的习题，并在书后附有答案。

《线性与非线性积分方程:方法及应用》可作为应用数学、工程学及其相关专业的高年级本科生和研究生教材，也可供相关领域的工程师参考。

《线性与非线性积分方程》

作者简介

作者：（美国）瓦斯瓦茨（Abdul-Majid Wazwaz）

书籍目录

part i linear integral equations

1 preliminaries

- 1.1 taylor series
- 1.2 ordinary differential equations
- 1.3 leibnitz rule for differentiation of integrals
- 1.4 reducing multiple integrals to single integrals
- 1.5 laplace transform
- 1.6 infinite geometric series
- references

2 introductory concepts of integral equations

- 2.1 classification of integral equations
- 2.2 classification of integro-differential equations
- 2.3 linearity and homogeneity
- 2.4 origins of integral equations
- 2.5 converting ivp to volterra integral equation
- 2.6 converting bvp to fredholm integral equation
- 2.7 solution of an integral equation
- references

3 volterra integral equations

- 3.1 introduction
- 3.2 volterra integral equations of the second kind
- 3.3 volterra integral equations of the first kind references

4 fredholm integral equations

- 4.1 introduction
- 4.2 fredholm integral equations of the second kind
- 4.3 homogeneous fredholm integral equation
- 4.4 fredholm integral equations of the first kind
- references

5 volterra integro-differential equations

- 5.1 introduction
- 5.2 volterra integro-differential equations of the second

kind

- 5.3 volterra integro-differential equations of the first

kind

- references

6 fredholm integro-differential equations

- 6.1 introduction
- 6.2 fredholm integro-differential equations of the second kind
- references

7 abel's integral equation and singular integral equations

- 7.1 introduction
- 7.2 abel's integral equation
- 7.3 the generalized abel's integral equation
- 7.4 the weakly singular volterra equations
- references

8 volterra-fredholm integral equations

- 8.1 introduction
- 8.2 the volterra-fredholm integral equations
- 8.3 the mixed volterra-fredholm integral equations
- 8.4 the mixed volterra-fredholm integral equations in two variables
- references
- 9 volterra-fredholm integro-differential equations
 - 9.1 introduction
 - 9.2 the volterra-fredholm integro-differential equation
 - 9.3 the mixed volterra-fredholm integro-differential equations
 - 9.4 the mixed volterra-fredholm integro-differential equations in two variables
 - references
- 10 systems of volterra integral equations
 - 10.1 introduction
 - 10.2 systems of volterra integral equations of the second kind
 - 10.3 systems of volterra integral equations of the first kind
 - 10.4 systems of volterra integro-differential equations
 - references
- 11 systems of fredholm integral equations
 - 11.1 introduction
 - 11.2 systems of fredholm integral equations
 - 11.3 systems of fredholm integro-differential equations
 - references
- 12 systems of singular integral equations
 - 12.1 introduction
 - 12.2 systems of generalized abel integral equations
 - 12.3 systems of the weakly singular volterra integral equations
 - references
- part ii nonlinear integral equations
- 13 nonlinear volterra integral equations
 - 13.1 introduction
 - 13.2 existence of the solution for nonlinear volterra integral equations
 - 13.3 nonlinear volterra integral equations of the second kind
 - 13.4 nonlinear volterra integral equations of the first kind
 - 13.5 systems of nonlinear volterra integral equations
 - references
- 14 nonlinear volterra integro-differential equations
 - 14.1 introduction
 - 14.2 nonlinear volterra integro-differential equations of the second kind
 - 14.3 nonlinear volterra integro-differential equations of the first kind

- 14.4 systems of nonlinear volterra integro-differential equations
 - references
- 15 nonlinear fredholm integral equations
 - 15.1 introduction
 - 15.2 existence of the solution for nonlinear fredholm integral equations
 - 15.3 nonlinear fredholm integral equations of the second kind
 - 15.4 homogeneous nonlinear fredholm integral equations
 - 15.5 nonlinear fredholm integral equations of the first kind
 - 15.6 systems of nonlinear fredholm integral equations
 - references
- 16 nonlinear fredholm integro-differential equations
 - 16.1 introduction
 - 16.2 nonlinear fredholm integro-differential equations.
 - 16.3 homogeneous nonlinear fredholm integro-differential equations
 - 16.4 systems of nonlinear fredholm integro-differential equations
 - references
- 17 nonlinear singular integral equations
 - 17.1 introduction
 - 17.2 nonlinear abel's integral equation
 - 17.3 the generalized nonlinear abel equation
 - 17.4 the nonlinear weakly-singular volterra equations
 - 17.5 systems of nonlinear weakly-singular volterra integral equations
 - references
- 18 applications of integral equations
 - 18.1 introduction
 - 18.2 volterra's population model
 - 18.3 integral equations with logarithmic kernels
 - 18.4 the fresnel integrals
 - 18.5 the thomas-fermi equation
 - 18.6 heat transfer and heat radiation
 - references
- appendix a table of indefinite integrals
 - a.1 basic forms
 - a.2 trigonometric forms
 - a.3 inverse trigonometric forms
 - a.4 exponential and logarithmic forms
 - a.5 hyperbolic forms
 - a.6 other forms
- appendix b integrals involving irrational algebraic functions
 - b.1 integrals involving n is an integer, $n \neq 0$
 - b.2 integrals involving n is an odd integer, $n = i$
- appendix c series representations
 - c.1 exponential functions series

《线性与非线性积分方程》

- c.2 trigonometric functions
- c.3 inverse trigonometric functions
- c.4 hyperbolic functions
- c.5 inverse hyperbolic functions
- c.6 logarithmic functions
- appendix d the error and the complementary error functions
 - d.1 the error function
 - d.2 the complementary error function
- appendix e gamma function
- appendix f infinite series
 - f.1 numerical series
 - f.2 trigonometric series
- appendix g the fresnel integrals
 - g.1 the fresnel cosine integral
 - g.2 the fresnel sine integral
- answers
- index

《线性与非线性积分方程》

章节摘录

版权页：插图：Integral equations and integro-differential equations will be classified into distinct types according to the limits of integration and the kernel $K(x, t)$. All types of integral equations and integro-differential equations will be classified and investigated in the forthcoming chapters. In this chapter, we will review the most important concepts needed to study integral equations. The traditional methods, such as Taylor series method and the Laplace transform method, will be used in this text. Moreover, the recently developed methods, that will be used thoroughly in this text, will determine the solution in a power series that will converge to an exact solution if such a solution exists. However, if exact solution does not exist, we use as many terms of the obtained series for numerical purposes to approximate the solution.

《线性与非线性积分方程》

编辑推荐

《线性与非线性积分方程:方法及应用》：关键词：线性与非线性Volterra方程，线性与非线性Fredholm方程，线性与非线性奇异方程，积分方程组。Nonlinear Physical Science focuses on the recent advances of fundamental theories and principles, analytical and symbolic approaches, as well as computational techniques in nonlinear physical science and nonlinear mathematics with engineering applications.

《线性与非线性积分方程》

精彩短评

1、书写的理论性不强，语句啰嗦重复。但是对初学者而言，很实用，可以照猫画虎，直接套用方法。适合自学，或作为工具手册。
