

# 《线性代数》

## 图书基本信息

书名：《线性代数》

13位ISBN编号：9787510004438

10位ISBN编号：7510004438

出版时间：2009-4

出版社：世界图书出版公司

作者：哥汝布

页数：451

版权说明：本站所提供下载的PDF图书仅提供预览和简介以及在线试读，请支持正版图书。

# 《线性代数》

## 前言

This textbook gives a detailed and comprehensive presentation of linear algebra based on an axiomatic treatment of linear spaces. For this fourth edition some new material has been added to the text, for instance, the intrinsic treatment of the classical adjoint of a linear transformation in Chapter IV, as well as the discussion of quaternions and the classification of associative division algebras in Chapter VII. Chapters XII and XIII have been substantially rewritten for the sake of clarity, but the contents remain basically the same as before. Finally, a number of problems covering new topics—e.g. complex structures, Cayley numbers and symplectic spaces—have been added. I should like to thank Mr. M. L. Johnson who made many useful suggestions for the problems in the third edition. I am also grateful to my colleague S. Halperin who assisted in the revision of Chapters XII and XIII and to Mr. F. Gomez who helped to prepare the Subject index. Finally, I have to express my deep gratitude to my colleague J. R. Vanstone who worked closely with me in the preparation of all the revisions and additions and who generously helped with the proof reading.

## 作者简介

作者：(美国) 哥汝布 (Greub.W.)

## 书籍目录

- Chapter 0. Prerequisites
- Chapter I. Vector spaces
  - 1. Vector spaces
  - 2. Linear mappings
  - 3. Subspaces and factor spaces
  - 4. Dimension
  - 5. The topology of a real finite dimensional vector space
- Chapter II. Linear mappings
  - 1. Basic properties
  - 2. Operations with linear mappings
  - 3. Linear isomorphisms
  - 4. Direct sum of vector spaces
  - 5. Dual vector spaces
  - 6. Finite dimensional vector spaces
- Chapter III. Matrices
  - 1. Matrices and systems of linear equations
  - 2. Multiplication of matrices
  - 3. Basis transformation
  - 4. Elementary transformations
- Chapter IV. Determinants
  - 1. Determinant functions
  - 2. The determinant of a linear transformation
  - 3. The determinant of a matrix
  - 4. Dual determinant functions
  - 5. The adjoint matrix
  - 6. The characteristic polynomial
  - 7. The trace
  - 8. Oriented vector spaces
- Chapter V. Algebras
  - 1. Basic properties
  - 2. Ideals
  - 3. Change of coefficient field of a vector space
- Chapter VI. Gradations and homology
  - 1.  $G$ -graded vector spaces
  - 2.  $G$ -graded algebras
  - 3. Differential spaces and differential algebras
- Chapter VII. Inner product spaces
  - 1. The inner product
  - 2. Orthonormal bases
  - 3. Normed determinant functions
  - 4. Duality in an inner product space.
  - 5. Normed vector spaces
  - 6. The algebra of quaternions
- Chapter VIII. Linear mappings of inner product spaces
  - 1. The adjoint mapping
  - 2. Self adjoint mappings
  - 3. Orthogonal projections

- 4. Skew mappings
- 5. Isometric mappings
- 6. Rotation of Euclidean spaces of dimension 2, 3 and 4
- 7. Differentiable families of linear automorphisms

## Chapter IX. Symmetric bilinear functions

- 1. Bilinear and quadratic functions
- 2. The decomposition of  $E$
- 3. Pairs of symmetric bilinear functions
- 4. Pseudo-Euclidean spaces
- 5. Linear mappings of Pseudo-Euclidean spaces

## Chapter X. Quadrics

- 1. Affine spaces
- 2. Quadrics in the affine space
- 3. Affine equivalence of quadrics
- 4. Quadrics in the Euclidean space

## Chapter XI. Unitary spaces

- 1. Hermitian functions
- 2. Unitary spaces
- 3. Linear mappings of unitary spaces
- 4. Unitary mappings of the complex plane
- 5. Application to Lorentz-transformations

## Chapter XII. Polynomial algebra

- 1. Basic properties
- 2. Ideals and divisibility
- 3. Factor algebras
- 4. The structure of factor algebras

## Chapter XIII. Theory of a linear transformation

- 1. Polynomials in a linear transformation
- 2. Generalized eigenspaces
- 3. Cyclic spaces
- 4. Irreducible spaces
- 5. Application of cyclic spaces
- 6. Nilpotent and semisimple transformations
- 7. Applications to inner product spaces

Bibliography

Subject Index

## 章节摘录

插图：

# 《线性代数》

## 编辑推荐

《线性代数(第4版)》是由世界图书出版公司出版的。

# 《线性代数》

## 精彩短评

1、好书，很经典。springer系列都很好
